LifeSize Communications, a division of Logitech has made every effort to ensure that the information contained in this document is accurate and reliable, but assumes no responsibility for errors or omissions. Information in this document is subject to change without notice. Companies, names, and data used in examples herein are fictitious unless noted. This document contains copyrighted and proprietary information which is protected by United States copyright laws and international treaty provisions. No part of the document may be reproduced or transmitted, in any form or by any means, electronic or mechanical, for any purpose, without the express written permission from LifeSize Communications.

Trademark Acknowledgments

LifeSize, the LifeSize logo and other LifeSize marks, are owned by Logitech and may be registered. All other trademarks are the property of their respective owners.

Patent Notice

For patents covering LifeSize® products, refer to http://www.lifesize.com/support/legal.

Contacting Customer Support

If you have questions, concerns, or need assistance, contact your product reseller or distributor.

Providing Customer Feedback

LifeSize Communications welcomes your comments regarding our products and services. If you have feedback about a LifeSize product, please send it to feedback@lifesize.com.

Contact information for LifeSize Communications is as follows:

Method	***Address***
Internet	http://www.lifesize.com
E-mail	support@lifesize.com
Phone	(877) LIFESIZE or (877) 543-3749 (512) 347-9300
Fax	(512) 347-9301

Safety Notices

English:

Read the installation instructions before connecting the system to the power source. Only trained and qualified personnel should be allowed to install, replace, or service this equipment. Do not work on the system or connect or disconnect cables during periods of lightning activity.

For products containing LAN, WAN, and/or TNV connections, the following notices apply:

To avoid electric shock, do not connect safety extra-low voltage (SELV) circuits to telephone-network voltage (TNV) circuits. LAN ports contain SELV circuits, and WAN ports contain TNV circuits. Some LAN and WAN ports both use RJ-45 connectors. Use caution when connecting cables.

The pluggable power cord on LifeSize products is intended to serve as the disconnect device. The socket-outlet to which this power cord is connected shall be installed near the equipment and be easily accessible. LifeSize recommends that the overcurrent protection on the building circuit powering the device not exceed 15A.

Use only the power supply and/or power cord provided with the product. Contact LifeSize to purchase replacement power cords and power supplies if needed. The power cord and power supply included with your product meet the voltage , current, and safety certifications required of the countries where the product is installed. LifeSize recommends you not use power cords rated less than 10A.

Warning

Shock hazard: follow all necessary precautions and regulations before connecting the equipment into a PSTN with the RJ-11 connector.

This equipment is for indoor use only.

Exercise care when connecting cables to the codec to avoid damaging cables or the connectors on the codec. Face the back of the codec or ensure that all connectors are visible when connecting a cable to the codec.

LifeSize Camera 200 and LifeSize Passport Only

Use only the power adapter supplied by LifeSize. The correct power adapter is Edac Power Electronics Co. Ltd. model EA1030C1 or Autec SA06-30S17R-V power supplies rated at 19 VDC, 1.57A. For replacement power adapters contact LifeSize.

When LifeSize Passport is configured with LifeSize Focus, the resulting system meets Class B EMI requirements and is suitable for home or office use. When LifeSize Passport is configured with LifeSize Camera, the resulting system meets Class A EMI requirements. This configuration is suitable for an office or light industrial application. Class A emissions in a domestic environment may cause unwanted interference.

Suomi (Finnish)

Lue asennusohjeet ennen järjestelmän yhdistämistä virtalähteeseen. Tämän laitteiston asennus, vaihto tai huolto tulee jättää koulutetun ja asiantuntevan henkilöstön tehtäväksi. Älä työskentele järjestelmän parissa tai yhdistä tai irrota kaapeleita ukonilman aikana.

Oheiset huomautukset koskevat niitä tuotteita, joissa on lähiverkko- (LAN), laajaverkko- (WAN) ja/tai TNV-yhteydet:

Sähköiskun välttämiseksi SELV-piirejä ei saa yhdistää puhelinverkkojännitteeseen (TNV-piireihin). LAN-portit sisältävät SELV-piirejä ja WAN-portit sisältävät TNV-piirejä. Joissakin LAN- ja WAN-porteissa käytetään RJ-45-liittimiä. Noudata varovaisuutta kaapeleiden yhdistämisessä.

Käytä ainoastaan tuotteen mukana toimitettua virtalähdettä ja/tai johtoa. Tilaa tarvittaessa LifeSize-yhtiöltä uusi virtajohto ja lisätarvikkeet. Tuotteen mukana toimitettu virtajohto ja virtalähde täyttävät jännitettä, tehoa ja turvallisuutta koskevat vaatimukset niissä maissa, joissa tuote on tarkoitettu asennettavaksi. LifeSize ei suosittele virtajohtoja, joiden luokitus on alle 10 A.

Varoitus:

Sähköiskun vaara: Noudata kaikkia tarpeellisia varotoimia ja määräyksiä ennen laitteiston yhdistämistä yleiseen puhelinverkkoon (PSTN) RJ-11-liittimellä.

Käytä ainoastaan laitteen mukana toimitettua virtalähdettä.

Tämä laite on tarkoitettu ainoastaan sisäkäyttöön.

Varo vahingoittamasta koodekin kaapeleita ja liittimiä yhdistäessäsi kaapeleita koodekkiin. Pidä koodekki itseäsi kohti tai varmista muutoin, että kaikki liittimet ovat näkyvissä, kun yhdistät kaapelin koodekkiin.

Vain LifeSize Camera 200 ja LifeSize Passport

Käytä ainoastaan LifeSizen toimittamaa virtasovitinta. Käytä vain Edac Power Electronics Co., Ltd:n mallinumeroa EA1030C1 tai Autec SA06-30S17R-V -virtalähteitä, tyyppi 19 VDC, 1,57 A. Varavirtasovittimia on saatavana LifeSize-yhtiöltä.

Kun LifeSize Passport -kokoonpanossa on LifeSize Focus, järjestelmä täyttää luokan B EMI-vaatimukset ja sopii kodeissa tai toimistoissa käytettäväksi. Kun LifeSize Passport -kokoonpanossa on LifeSize Camera, järjestelmä täyttää luokan A EMI-vaatimukset. Tämä kokoonpano sopii toimistoissa tai kevyen teollisuuden sovelluksissa käytettäväksi. Luokan A päästöt kotitalousympäristössä voivat aiheuttaa epätoivottuja häiriöitä.

Français (French)

Avant de brancher le système sur la source d'alimentation, consulter les directives d'installation. Il est vivement recommandé de confier l'installation, le remplacement et la maintenance de ces équipements à des personnels qualifiés et expérimentés. Ne pas travailler sur le système ni brancher ou débrancher les câbles pendant un orage.

Les notifications suivantes s’appliquent aux produits ayant des connexions LAN, WAN et/ou TNV :

Pour éviter une électrocution, ne raccordez pas les circuits de sécurité basse tension (Safety Extra-Low Voltage ou SELV) à des circuits de tension de réseau téléphonique (Telephone Network Voltage ou TNV). Les ports du réseau local (LAN) contiennent des circuits SELV et les ports du réseau longue distance (WAN) sont munis de circuits TNV. Certains ports LAN et WAN utilisent des connecteurs RJ-45. Raccordez les câbles en prenant toutes les précautions nécessaires.

Utilisez uniquement le module d'alimentation et/ou le cordon d'alimentation fournis avec l'appareil. Contactez LifeSize pour acheter un cordon d'alimentation/module d'alimentation de rechange, le cas échéant. Le cordon d'alimentation et le module d'alimentation inclus avec votre produit sont conformes aux normes de tension, courant et sécurité des pays où le produit est installé. LifeSize vous recommande de ne pas utiliser un cordon d'alimentation ayant une capacité nominale inférieure à 10 A.

Avertissement :

Danger de choc électrique : suivez toutes les directives et précautions nécessaires avant de brancher l’équipement dans un appareil RTPC à l’aide du connecteur RJ-11.

Utilisez uniquement le module d’alimentation fourni avec l’appareil.

Cet équipement est destiné à un usage intérieur uniquement.

Procédez avec précaution lors du branchement du codec pour éviter d'endommager les câbles ou les connecteurs figurant sur le codec. Placez l'arrière du codec face à vous ou assurez-vous que tous les connecteurs sont visibles lors du branchement d'un câble au codec.

LifeSize Camera 200 et LifeSize Passport Seulement

Utilisez uniquement l’adaptateur d’alimentation fourni par LifeSize. L’adaptateur d’alimentation approprié est le modèle EA1030C1 d’Edac Power Electronics Co. Ltd. ou le modèle Autec SA06-30S17R-V alimenté à une tension de 19 VCC, 1,57 A. Pour remplacer les adaptateurs d’alimentation, contactez LifeSize.

Lorsque LifeSize Passport est configuré avec LifeSize Focus, le système final répond aux exigences de la norme EMI, Classe B, et est adapté pour une utilisation professionnelle comme privée. Lorsque LifeSize Passport est configuré avec LifeSize Camera, le système final répond aux exigences de la norme EMI, Classe A. Cette configuration est adaptée aux applications de bureau ou de l’industrie légère. Les émissions de Classe A dans un environnement domestique peuvent provoquer des interférences accidentelles.

Deutsch (German)

Vor dem Anschließen des Systems an die Stromquelle die Installationsanweisungen lesen. Das Installieren, Ersetzen oder Bedienen dieser Ausrüstung sollte nur geschultem, qualifiziertem Personal gestattet werden. Arbeiten Sie nicht am System und schließen Sie keine Kabel an bzw. trennen Sie keine ab, wenn es gewittert.

Für Produkte mit LAN-, WAN- und/oder TNV-Verbindungen gelten die folgenden Hinweise:

Zur Vermeidung von Elektroschock die Sicherheits-Kleinspannungs-Stromkreise (SELV-Kreise) nicht an Fernsprechnetzspannungs-Stromkreise (TNV-Kreise) anschließen. LAN-Ports enthalten SELV-Kreise, und WAN-Ports enthalten TNV-Kreise. Einige LAN- und WAN-Ports verwenden auch RJ-45-Steckverbinder. Vorsicht beim Anschließen von Kabeln.

Verwenden Sie nur das mit dem Produkt gelieferte Netzteil bzw. Netzkabel. Wenden Sie sich an LifeSize, um bei Bedarf Ersatz für die Netzkabel oder Netzteile zu erwerben. Das mit dem Produkt mitgelieferte Netzkabel und Netzteil entspricht den Spannungs-, Strom- und Sicherheitszertifizierungen für die Länder, in denen das Produkt installiert wird. LifeSize empfiehlt die Verwendung von Netzkabeln mit einer Einstufung von weniger als 10 A.

Warnung:

Stromschlaggefahr: alle erforderlichen Vorsichtsmaßnahmen und Vorschriften befolgen, bevor das Gerät mit dem RJ-11-Steckverbinder am PSTN-Anschluss (Telefonnetz) angeschlossen wird.

Nur den mit dem Gerät gelieferten Netzadapter verwenden.

Dieses Gerät darf nur in Gebäuden eingesetzt werden.

Beim Anschließen von Kabeln am Codec ist vorsichtig vorzugehen, um Beschädigungen der Kabel oder Codec-Anschlüsse zu vermeiden. Blicken Sie auf die Rückseite des Codec, oder stellen Sie sicher, dass beim Anschließen eines Kabels an den Codec alle Anschlüsse zu sehen sind.

Nur LifeSize Camera 200 und LifeSize Passport

Verwenden Sie nur den von LifeSize mitgelieferten Netzadapter. Der korrekte Netzadapter ist Edac Power Electronics Co., Ltd. Modellnr. EA1030C1 oder Autec SA06-30S17R-V Netzteile, 19 VDC, 1,57A. Netzadapterersatz erhalten Sie von LifeSize.

Wenn LifeSize Passport mit LifeSize Focus konfiguriert wird, erfüllt das sich daraus ergebende System die EMI-Anforderungen gemäß Klasse B und ist zur Verwendung zu Hause und im Büro geeignet. Wenn LifeSize Passport mit LifeSize Camera konfiguriert wird, erfüllt das sich daraus ergebende System die EMI-Anforderungen gemäß Klasse A. Diese Konfiguration eignet sich für eine Büro- oder leichte industrielle Anwendung. Emissionen der Klasse A können in einer Wohngegend unerwünschte Störungen verursachen.

Italiano (Italian)

Consultare le istruzioni di installazione prima di collegare il sistema all'alimentatore. Questo apparato può essere installato, sostituito o mantenuto unicamente da un personale competente. Non lavorare sul sistema o collegare oppure scollegare i cavi durante un temporale con fulmini.

Per prodotti che contengono connessioni LAN, WAN e/o TNV, si applicano le seguenti indicazioni:

Per evitare scosse elettriche, non collegare circuiti di sicurezza a tensione molto bassa (SELV) ai circuiti a tensione di rete telefonica (TNV). Le porte LAN contengono circuiti SELV e le porte WAN contengono circuiti TNV. Alcune porte LAN e WAN fanno uso di connettori RJ-45. Fare attenzione quando si collegano cavi.

Usare solo l'alimentatore e/o il cavo di alimentazione forniti con il prodotto. Contattare LifeSize per acquistare cavi di alimentazione e alimentatori di ricambio se necessario. Il cavo di alimentazione e l'alimentatore compresi nel prodotto sono conformi a tensione, corrente e certificazioni di sicurezza necessarie nel paese in cui il prodotto viene installato. LifeSize consiglia di non usare cavi di alimentazioni tarati a meno di 10 A.

Attenzione:

Pericolo di scosse elettriche: prendere tutte le precauzioni necessarie e seguire le normative di legge prima di collegare l'apparecchiatura a un PTSN con il connettore Rj-11.

Utilizzare solamente l'alimentatore fornito di serie.

L'apparecchiatura è solamente per uso interno.

Fare attenzione a non danneggiare cavi o connettori sul codec durante il collegamento dei cavi al codec. Girare il retro del codec o verificare che tutti i connettori siano visibili quando si collega un cavo al codec.

LifeSize Camera 200 e LifeSize Passport Solo

Usare solo l'alimentatore fornito da LifeSize. L'alimentatore adeguato è Edac Power Electronics Co., Ltd. modello EA1030C1 oppure Autec SA06-30S17R-V, tensione nominale 19 Vcc, 1.57A. Per la sostituzione degli alimentatori, contattare LifeSize.

Quando LifeSize Passport è configurato con LifeSize Focus, il sistema ottenuto è conforme ai requisiti EMI Classe B ed è idoneo per l'uso a casa e in ufficio. Quando LifeSize Passport è configurato con LifeSize Camera, il sistema ottenuto è conforme ai requisiti EMI Classe A. Questa configurazione è idonea per l'ufficio o per applicazioni civili e industriali. Emissioni di classe A in un ambiente domestico possono causare interferenze indesiderate.

Norsk (Norwegian)

Les installasjonsinstruksjonene før systemet kobles til strømkilden. Bare opplært og kvalifisert personell skal foreta installasjoner, utskiftninger eller service på dette utstyret. Utfør aldri arbeid på systemet, eller koble kabler til eller fra systemet når det tordner eller lyner.

Følgende meddelelser gjelder for produkter som inneholder tilkoblinger av typen LAN, WAN og/eller TNV:

Unngå å koble lavspenningskretser (SELV) til kretser for telenettspenning (TNV), slik at du unngår elektrisk støt. LAN-utganger inneholder SELV-kretser og WAN-utganger inneholder TNV-kretser. Det finnes både LAN-utganger og WAN-utganger som bruker RJ-45-kontakter. Vær forsiktig når du kobler kabler.

Bruk kun strømforsyningsenheten og/eller nettledningen som følger med produktet. Kontakt LifeSize for å kjøpe nye nettledninger og strømforsyningsenheter ved behov. Nettledningen og strømforsyningsenheten som følger med produktet oppfyller spennings-, effekt- og sikkerhetsgodkjennelsene i landene der produktet er installert. LifeSize anbefaler ikke bruk av nettledninger dimensjonert for under 10 A.

Advarsel:

Fare for elektrisk støt: Følg alle nødvendige foranstaltninger og forskrifter før du kobler til utstyret ved hjelp av RJ-11-kontakten til en PSTN.

Bruk kun den strømforsyningen som er levert sammen med enheten.

Dette utstyret må kun brukes innendørs.

Vær forsiktig ved tilkopling av kabler til kodeken for å unngå skader på kabler eller koplingene på kodeken. Stå vendt mot baksiden av kodeken ved tilkopling av en kabel til kodeken, eller sørg for alle koplinger er synlige.

Bare LifeSize Camera 200 og LifeSize Passport

Bruk bare strømadapteren som er levert av LifeSize. Riktige strømadaptere er Edac Power Electronics Co. Ltd. modell EA1030C1 eller Autec SA06-30S17R-V strømforsyninger klassifisert som 19 VDC, 1,57 A. Kontakt LifeSize ved behov for å skifte ut strømadaptere.

Når LifeSize Passport er konfigurert med LifeSize Focus, tilfredsstiller systemet kravene til Klasse B EMI og egner seg for bruk hjemme eller på kontoret. Når LifeSize Passport er konfigurert med LifeSize Camera, tilfredsstiller systemet kravene til Klasse A EMI. Denne konfigurasjonen egner seg for bruk på kontoret eller i lettindustrien. Klasse A-emisjon i et boligmiljø kan forårsake forstyrrende interferens.

Polski (Polish)

Przed podłączeniem systemu do źródła zasilania należy przeczytać instrukcję instalacji. Instalację, wymianę lub serwisowanie sprzętu może przeprowadzać wyłącznie przeszkolony personel posiadający odpowiednie kwalifikacje. Nie wolno korzystać z urządzenia ani podłączać lub odłączać kabli w czasie burzy.

Poniższe uwagi dotyczą produktów ze złączami LAN, WAN i/lub TNV:

Aby uniknąć porażenia prądem, nie wolno podłączać obwodów niskiego napięcia bezpiecznego (SELV) do obwodów pod napięciem sieci telefonicznej (TNV). Porty LAN zawierają obwody SELV, a porty WAN — obwody TNV. Niekiedy zarówno w portach LAN i WAN stosowane są złącza RJ-45. Należy zachować ostrożność podczas podłączania kabli.

Nalezy uzywac wylacznie ukladu oraz(lub) kabla zasilajacego, dostarczonego razem z produktem. W razie koniecznosci skontaktuj sie z LifeSize w celu zakupu zamiennych ukladów i kabli zasilajacych. Kabel i uklad zasilajacy, dolaczone do produktu, spelniaja wymagania certyfikacji napiecia, natezenia pradu oraz bezpieczenstwa dla krajów, w których produkt jest instalowany. LifeSize zaleca nieuzywanie kabli zasilajacych o klasie nizszej niz 10 A.

Ostrzeżenie:

Ryzyko porażenia prądem: przed podłączeniem sprzętu do złącza PSTN lub RJ-11 należy przestrzegać wszystkich wymaganych środków ostrożności i przepisów.

Należy używać wyłącznie zasilacza dostarczonego z urządzeniem.

Sprzęt przeznaczony jest wyłącznie do użytku w pomieszczeniach.

Należy zachować ostrożność podczas podłączania kabli kodeka, aby zapobiec uszkodzeniu kabli lub złączy kodeka. Podczas podłączania kabli kodeka należy obserwować tylną część urządzenia lub upewnić się, że wszystkie złącza są widoczne.

Tylko urządzenia LifeSize Camera 200 i LifeSize Passport:

Należy używać wyłącznie oryginalnego zasilacza firmy LifeSize. Można używać zasilaczy Edac Power Electronics Co. Ltd. model EA1030C1 lub Autec SA06-30S17R-V o wartości znamionowej 19 V prądu stałego, 1,57 A. Aby zakupić nowy zasilacz, należy skontaktować się z firmą LifeSize.

Gdy system LifeSize Passport jest skonfigurowany z urządzeniem LifeSize Focus, otrzymany system spełnia wymogi dotyczące zakłóceń elektromagnetycznych w klasie B i jest odpowiedni do zastosowań w domu i biurze. Gdy system LifeSize Passport jest skonfigurowany z urządzeniem LifeSize Camera, uzyskany system spełnia wymogi dotyczące zakłóceń elektromagnetycznych w klasie A. System ten jest odpowiedni do zastosowań w biurze oraz w przemyśle lekkim. Emisja w klasie A w środowisku domowym może powodować niepożądane zakłócenia.

Português (Portuguese)

Leia as instruções de instalação antes de ligar o sistema à fonte de energia. Apenas pessoal treinado e qualificado deve ser autorizado a instalar, substituir ou fazer a revisão deste equipamento. Não trabalhe no sistema ou ligue e desligue cabos durante períodos de mau tempo (trovoada).

Para produtos que contêm conexões LAN, WAN ou TNV, aplicam-se os seguintes avisos:

Para evitar choques eléctricos, não conecte os circuitos de segurança de baixa tensão (SELV) aos circuitos de tensão de rede telefónica (TNV). As portas LAN contêm circuitos SELV e as portas WAN contêm circuitos TNV. Algumas portas LAN e WAN usam conectores RJ-45. Tenha o devido cuidado ao conectar os cabos.

Use somente o cabo e a fonte de alimentação de energia fornecidos com o produto. Contate a LifeSize para adquirir fontes de alimentação e fios elétricos de reposição, se necessário. O cabo e a fonte de alimentação fornecidos com o produto apresentam conformidade com as certificações regulatórias de tensão, corrente e segurança dos países em que o produto é instalado. A LifeSize recomenda não usar cabos de alimentação com classificação nominal abaixo de 10 A.

Cuidado:

Risco de choque elétrico: siga todas as regulamentações e tome todas as precauções necessárias antes de conectar o equipamento em rede RTPC com conector RJ-11.

Use apenas a fonte de alimentação fornecida com a unidade.

Este equipamento só deve ser usado em ambiente interno.

Tenha cuidado e evite danificar os cabos ao conectá-los ao codec ou aos conectores do codec. Ao conectar um cabo ao codec, coloque-se de frente para o painel traseiro do codec ou assegure-se de que todos os conectores estejam visíveis.

Somente LifeSize Camera 200 e LifeSize Passport

Use somente o adaptador de energia fornecido pela LifeSize. O adaptador de energia correto é o Edac Power Electronics Co., Ltd. modelo número EA1030C1, ou fontes de alimentação Autec SA06-30S17R-V classificadas para 19 VCC, 1,57A. Para obter adaptadores de energia de reposição, contate a LifeSize.

Quando o LifeSize Passport é usado com o LifeSize Focus, o sistema resultante atende aos requisitos de interferência eletromagnética (EMI) Classe B, portanto, é adequado para uso residencial ou em escritório. Quando o LifeSize Passport é usado com a LifeSize Camera, o sistema resultante atende aos requisitos de interferência eletromagnética (EMI) Classe A. Esta configuração é adequada para aplicações industriais leves e em escritórios. Emissões de Classe A em ambiente doméstico pode produzir interferência indesejável.

Español (Spanish)

Lea las instrucciones de instalación antes de conectar el sistema a la red de alimentación. Solamente el personal calificado debe instalar, reemplazar o utilizar este equipo. No operar el sistema ni conectar o desconectar cables durante el transcurso de descargas eléctricas en la atmósfera.

Los avisos siguientes se aplican a los productos que contengan conexiones LAN, WAN y/o TNV:

Para evitar la sacudida eléctrica, no conectar circuitos de seguridad de voltaje muy bajo (safety extra-low voltage = SELV) con circuitos de voltaje de red telefónica (telephone network voltage = TNV). Los puertos de redes de área local (local area network = LAN) contienen circuitos SELV, y los puertos de redes de área extendida (wide area network = WAN) contienen circuitos TNV. En algunos casos, tanto los puertos LAN como los WAN usan conectores RJ-45. Proceda con precaución al conectar los cables.

Use sólo la fuente y el cable de alimentación proporcionados con el producto. Póngase en contacto con LifeSize para adquirir fuentes y cables de alimentación de repuesto si los necesita. La fuente y el cable de alimentación incluidos con el producto cumplen con las certificaciones relativas a voltaje, corriente y seguridad requeridas en los países donde se instala el producto. LifeSize le recomienda no utilizar cables de alimentación de capacidad inferior a 10 A.

Advertencia:

Peligro de descarga eléctrica: siga todas las precauciones y normas necesarias antes de conectar el equipo a una RTC con el conector RJ-11.

Use sólo la fuente de alimentación proporcionada con la unidad.

Este equipo sólo se puede usar en interiores.

Tenga cuidado al conectar los cables al codec para no dañar ni los cables ni los conectores del codec. Colóquese frente a la parte posterior del codec o asegúrese de que todos los conectores son visibles al conectar un cable al codec.

LifeSize Camera 200 y LifeSize Passport Sólo

Utilice sólo el adaptador de corriente suministrado por LifeSize. El adaptador de corriente adecuado es el de Edac Power Electronics Co., Ltd. modelo EA1030C1 o el de Autec SA06-30S17R-V con una potencia nominal de 19 VCC y 1,57 A. Para reemplazar los adaptadores de corriente póngase en contacto con LifeSize.

Cuando LifeSize Passport se configura con LifeSize Focus, el sistema resultante cumple los requisitos Clase B EMI y es adecuado para el uso doméstico o de oficina. Cuando se configura LifeSize Passport con LifeSize Camera, el sistema resultante cumple los requisitos Clase A EMI. Esta configuración es adecuada para una aplicación industrial ligera o de oficina. Las emisiones de Clase A en un entorno doméstico puede causar interferencias indeseables.

Русский (Russian)

Перед подключением устройства к источнику электропитания ознакомьтесь с данной инструкцией по установке. Установку, замену и обслуживание этого оборудования может осуществлять только специально обученный квалифицированный персонал.

Для изделий, имеющих подключения LAN, WAN и/или TNV, применяются следующие уведомления:

Не следует работать с устройством, а также подключать или отключать кабели во время грозы. Во избежание поражения электрическим током не подключайте цепи безопасного низковольтного напряжения (SELV) к цепям с напряжением телефонной цепи (TNV). Порты LAN подключены к цепям SELV, а порты WAN – к цепям TNV. Для некоторых портов LAN и WAN используются одинаковые разъемы – RJ-45. При подключении кабелей будьте внимательны.

Используйте только источник питания и/или шнур питания, прилагаемый к изделию. При необходимости обратитесь в компанию LifeSize для приобретения шнуров питания и источников питания для замены. Шнур питания и источник питания, прилагаемые к вашему изделию, соответствуют напряжению, току и требуемым сертификатам безопасности стран, где устанавливается изделие. LifeSize рекомендует не использовать шнуры питания, рассчитанные менее чем на 10 A.

Предупреждение:

Опасность поражения электрическим током: перед подключением оборудования к линии ТфОП при помощи разъема RJ-11 соблюдайте все меры предосторожности и нормативные требования.

Используйте только источник питания, поставляемый с устройством.

Данное оборудование предназначено только для использования в помещениях.

Будьте осторожны при подключении кабелей к кодеку, чтобы не повредить кабели или разъемы кодека. При подключении кабеля к кодеку располагайтесь лицом к задней стенке кодека или убедитесь, что вам видны все подключения.

Только LifeSize Camera 200 и LifeSize Passport

Используйте только адаптер питания, прилагаемый к LifeSize. Надлежащими адаптерами питания являются источники питания Edac Power Electronics Co., Ltd., модели EA1030C1 или Autec SA06-30S17R-V, рассчитанные на 19 В пост. тока, 1,57 A. Для замены адаптеров питания обратитесь в LifeSize.

При конфигурации LifeSize Passport с LifeSize Focus полученная система соответствует требованиям по ЭМП класса B и может использоваться для домашнего или офисного применения. При конфигурации LifeSize Passport с LifeSize Camera, полученная система соответствует требованиям по ЭМП класса A. Данная конфигурация подходит для применения в офисе или на небольших производствах. Эмиссии класса A в домашней среде могут приводить к нежелательным помехам.

Svenska (Swedish):

Läs installationsanvisningarna innan du kopplar systemet till strömförsörjningsenheten. Endast utbildad och kvalificerad personal bör få tillåtelse att installera, byta ut eller reparera denna utrustning. Vid åska skall du aldrig utföra arbete på systemet eller ansluta eller koppla loss kablar.

För produkter som innehåller LAN-, WAN- och/eller TNV-anslutningar gäller följande:

För att undvika elektriska stötar, koppla inte säkerhetskretsar med extra låg spänning (SELV-kretsar) till kretsar med telefonnätspänning (TNV-kretsar). LAN-portar innehåller SELV-kretsar och WAN-portar innehåller TNV-kretsar. Vissa LAN- och WAN-portar är försedda med RJ-45-kontakter. Iaktta försiktighet vid anslutning av kablar.

Använd endast den nätadapter och/eller den strömsladd som tillhandahålls med produkten. Kontakta LifeSize för att vid behov köpa nya strömsladdar och nätadaptrar. Strömsladden och nätadaptern som levererades med din produkt uppfyller de certifieringar för spänning, strömstyrka och säkerhet som krävs i de länder där produkten installeras. LifeSize rekommenderar att du inte använder strömsladdar med märkning under 10 A.

Varning:

Risk for stotar: folj alla sakerhetsforeskrifter innan du ansluter utrustningen till ISDN PORTEN.

Får endast användas med den strömadapter som levererades med enheten.

Denna utrustning är endast avsedd för användning inomhus.

Var försiktig när du ansluter kablarna till codec för att undvika skador på kablarna eller kontakterna på codec. Vänd dig mot baksidan på codec eller stå så att du ser alla kontakterna när du ansluter en kabel till codec.

Endast LifeSize Camera 200 Och LifeSize Passport

Använd endast den strömadapter som tillhandahållits av LifeSize. Korrekt strömadapter är Edac Power Electronics Co., Ltd. modellnummer EA1030C1 eller Autec SA06-30S17R-V strömadaptrar, specificerade för 19 v likström, 1,57 A. Kontakta LifeSize för ersättning av strömadaptrar.

När LifeSize Passport är konfigurerat med LifeSize Focus, uppfyller detta system kraven för Klass B EMI och är lämpligt att användas i hem- och kontorsmiljö. När LifeSize Passport är konfigurerat med LifeSize Camera, uppfyller detta system kraven för Klass A EMI. Denna konfiguration är lämplig för tillämpningar på kontor eller inom lätt industri. Klass A-utsläpp i hemmiljö kan orsaka icke önskvärda störningar.

简体中文 (Simplified Chinese)

在将系统与电源连接之前，请仔细阅读安装说明。只有经过培训且具有资格的人员才能进行此设备的安装、更换和维修。请勿在发生雷电时操作系统，也不要在此期间连接或断开电缆。

对于包含 LAN， WAN 和 / 或 TNV 连接的产品，以下说明适用：

为避免电击，请勿将安全特低电压 （SELV）电路连接到电话网电压 （TNV）电路上， LAN 端口属 SELV 电路，而 WAN 端口属 TNV 电路。某些 LAN 和 WAN 端口都使用 RJ-45 接头，连接电缆时请务必小心

必须使用产品附带的电源和 / 电源线。如需购买替换电源线和电源，请联系 LifeSize。产品附带的电源线和电源符合产品安装所在国家 / 地区要求的电压、电流和安全认证。 LifeSize 推荐您使用额定电流不低于 10 A 的电源线。

警告：

触电危险：在将设备接入 PSTN （公共交换电话网络）的 RJ-11 接口前，应采取所有必要的预防措施并遵守相关规定。

必须使用装置附带的电源。

本设备仅供室内使用。

在将线缆连接到编码解码器时要当心，以免损坏线缆或编码解码器上的连接器。连接时，应面向编码解码器的背面或确保能看到所有连接器。

- • **LifeSize Camera 200** • **LifeSize Passport**

只能使用 LifeSize 提供的电源适配器。正确的电源适配器是 Edac Power Electronics Co., Ltd. 型号为 EA1030C1 或 Autec 型号为 SA06-30S17R-V 的电源，电源额定值为 19 V 直流， 1.57A。若需更换电源适配器，请联系 LifeSize。

当 LifeSize Passport 配置了 LifeSize Focus 时，构成的系统符合 B 类 EMI（电磁干扰）要求，适合家用或办公室使用。当 LifeSize Passport 配置了 LifeSize Camera 时，构成的系统符合 A 类 EMI （电磁干扰）要求。此配置适合办公室或轻工业应用场合。家居环境中的 A 类电磁辐射可能会造成有害的干扰。

繁體中文 (Traditional Chinese):

在將系統與電源連接之前，請仔細閱讀安裝說明。

唯有經訓練的合格人員才能安裝、替換或維修該設備。

請勿在發生雷電時操作系統，也不要在此期間連接或斷開電纜。

對於包含 LAN、WAN 和 / 或 TNV 連線的產品，以下通告適用：

爲避免觸電，切勿將安全特低電壓 （SELV）電路連接到電話網路電壓 （TNV）電路。LAN 埠包含 SELV 電路，而 WAN 埠則包含 TNV 電路。有些 LAN 和 WAN 埠均使用 RJ-45 連接器。連接電纜時請務必小心。

僅使用隨產品提供的電源和 / 或電源線。需要時可聯絡 LifeSize 購買替換用的電源線和電源。您的產品所包含的電源線和電源滿足產品安裝地的電壓、電流及安全認證要求。LifeSize 建議您不要使用 10 A 等級以下的電源線。

警告：

電擊危險： 使用 RJ-11 連接器將設備連接到 PSTN 之前，請遵循所有必要的防範措施和規章。

只能使用隨裝置一起提供的電源。

該設備僅供室內使用。

將纜線連接至編解碼器時要小心，以防損壞纜線或編解碼器的連接器。將纜線連接至編解碼器時，面朝編解碼器背部或確保可以看見所有連接器。

僅 LifeSize Camera 200 和 LifeSize Passport

僅使用由 LifeSize 提供的電源配接器。適用的電源配接器爲 Edac Power Electronics Co., Ltd. 型號 EA1030C1 或 Autec SA06-30S17R-V 額定值爲 19 VDC、1.57A 的電源。請聯絡 LifeSize 取得供更換的電源配接器。

當 LifeSize Passport 配有 LifeSize Focus 時，組成的系統符合 B 類 EMI 要求，適於家庭或辦公室使用。當 LifeSize Passport 配有 LifeSize Camera 時，組成的系統符合 A 類 EMI 要求。這種配置適於辦公室或輕工業應用。室內 A 類放射可能會導致有害的干擾。

日本語 (Japanese)

必ず設置手順を読んでから、システムを電源に接続してください。この装置の設置、交換、保守は、訓練を受けた相応の資格のある人が行ってください。

LAN、WAN、TNV 接続を含む製品には、次の通知が適用されます。

雷が発生しているときは、システムに手を加えたり、ケーブルの接続や取り外しを行わないでください。感電事故を防ぐため、Safety Extra-low Voltage（SELV）回路を Telephone-Network Voltage（TNV；電話網電圧 ）回路に接続しないでください。LAN ポートには SELV 回路、WAN ポートには TNV 回路が使用されています。LAN ポートおよび WAN ポートによっては、どちらも RJ-45 コネクタが使用されている場合があります。ケーブルを接続するときは注意してください。

製品に付属の電源および電源コードのみを使用してください。予備の電源および電源コードのご購入については、LifeSize までお問い合わせください。製品に付属の電源および電源コードは、製品をお使いいただく国の電源、電流、必要な安全証明を満たしています。LifeSize では、10 A 未満の定格の電源コードを使用しないよう推奨しています。

警告：

感電の危険： RJ-11 コネクタを使用してこの機器を PSTN に接続する前に、必要な注意事項や規定に必ず従ってください。

機器に付属の電源のみをお使いください。

この機器は、屋内専用です。

コーデックにケーブルを接続する際には、ケーブルやコーデックのコネクタが損傷しないようご注意ください。コーデックの背面またはコーデックに接続するコネクタがすべて見える状態で行ってください。

LifeSize Camera 200 および LifeSize Passport のみ

LifeSize が提供する電源アダプタのみを使用してください。正しい電源アダプタは、Edac Power Electronics Co., Ltd. のモデル番号 EA1030C1 または定格 19 VDC、1.57A の Autec SA06-30S17R-V 電源です。電源アダプタの交換については、LifeSize までお問い合わせください。

LifeSize Passport が LifeSize Focus とともに構成されている場合、この組み合わせは、クラス B の EMI 要件を満たしており、自宅やオフィスでの使用に適切です。LifeSize Passport が LifeSize Camera と構成されている場合、この組み合わせはクラス A の EMI 要件を満たします。この構成は､オフィスまたは軽度の工業アプリケーションに適しています。家庭環境では、クラス A エミッションが好ましくない干渉を引き起こすことがあります。

한국어 (Korean):

시스템을 전원에 연결하기 전에 설치 지침을 읽으십시오 .
교육을 받고 자격을 갖춘 사람만 이 장비를 설치 , 교체 , 또는 서비스를 수행해야 합니다 .
번개가 치는 동안에는 시스템에서 작업하거나 케이블을 연결 또는 해제하지 마십시오 .

LAN, WAN 및/또는 TNV 연결이 가능한 제품에는 다음 고지가 적용됩니다.

감전을 피하기 위하여는 , 전화 네트워크 전압 (TNV) 회로에 안전 여분 낮은 전압 (SELV) 회로를 연결하지 말라 . 근거리 통신망 항구는 SELV 회로를 포함하고 , WAN 항구는 TNV 회로를 포함한다 . 어떤 근거리 통신망 및 WAN 는 두 사용 RJ-45 연결관 다 향한다 . 케이블을 연결할 경우의 사용 주의 .

제품과 함께 제공된 전원 공급 장치 및 / 또는 전원 코드만 사용하십시오 . 교체용 전원 코드와 전원 공급 장치를 구입하려면 LifeSize 로 연락하십시오 . 제품에 포함된 전원 코드와 전원 공급 장치는 제품이 설치된 국가에서 요구하는 전압 , 전류 및 안전 인증을 충족합니다 .
LifeSize 에서는 정격 전류가 10 A 미만인 전원 코드는 사용하지 않을 것을 권장합니다 .

경고 :

감전 위험 : RJ-11 커넥터를 사용하여 PSTN 에 장비를 연결하기 전에 필요한 모든 사전 주의 사항과 규정을 준수하십시오 .

장치와 함께 제공된 전원 공급장치만 사용하십시오 .

이 제품은 실내 전용 장비입니다 .

코덱에 케이블을 연결할 때는 케이블이나 코덱의 커넥터가 손상되지 않도록 주의하십시오 .
코덱에 케이블을 연결할 때 코덱 후면이 정면을 향하게 또는 모든 커넥터가 보이게 하십시오 .

LifeSize Camera 200 과 LifeSize Passport 만 해당

LifeSize 에서 제공한 전원 어댑터만 사용하십시오. 올바른 전원 어댑터는 Edac Power Electronics Co., Ltd. 모델 EA1030C1 또는 Autec SA06-30S17R-V 전원 공급 장치 (정격: 19VDC, 1.57A) 입니다. 전원 어댑터를 교체하려면 LifeSize에 문의하십시오.

LifeSize Passport 를 LifeSize Focus 와 함께 구성할 경우, 그에 따른 시스템은 Class B EMI 요구 사항을 충족하며 가정용 또는 사무실용으로 적합합니다. LifeSize Passport 를 LifeSize Camera 와 함께 구성할 경우, 그에 따른 시스템은 Class A EMI 요구 사항을 충족하며 사무실용 또는 경공업용으로 적합합니다. 가정 환경에서 Class A 방출이 발생하면 원치 않는 간섭이 생길 수 있습니다.

Special Notice for LifeSize Video Systems and Conference Bridge Installations

The following special notice applies to users installing LifeSize video systems and conference bridge products in Norway, Finland, or Sweden. The installer must ensure the AC receptacle providing power to the LifeSize product is connected to a reliable earth ground in accordance with the local codes and standards.

Finland

Seuraava erityishuomautus koskee käyttäjiä, jotka asentavat LifeSize-videojärjestelmiä ja neuvottelusiltatuotteita Norjassa, Suomessa tai Ruotsissa. Asentajan tulee varmistaa, että LifeSize-tuotteen verkkovirtarasia on luotettavasti maadoitettu paikallisten määräysten ja standardien mukaisesti.

Norway

Følgende spesielle merknad gjelder for brukere som installerer LifeSizes videosystemer og konferansenettverksprodukter i Norge, Finland eller Sverige. Installatøren må sørge for at vekselstrømkontakten som forsyner LifeSize-produktet med strøm er koblet til en pålitelig jording i samsvar med lokale lover og standarder.

Sweden

Följande specialnotis gäller användare som installerar LifeSize-videosystem och konferensbryggprodukter i Norge, Finland eller Sverige. Den person som utför installationen måste säkerställa att växelströmsuttaget som ska användas med LifeSize-produkten har pålitlig jordning i enlighet med lokala föreskrifter och normer.

Special Notice for LifeSize Bridge Installations

Warning

Rack mounting must be performed in accordance with instructions provided by LifeSize to avoid potential hazards. Refer to the installation guide for rack mounting instructions.

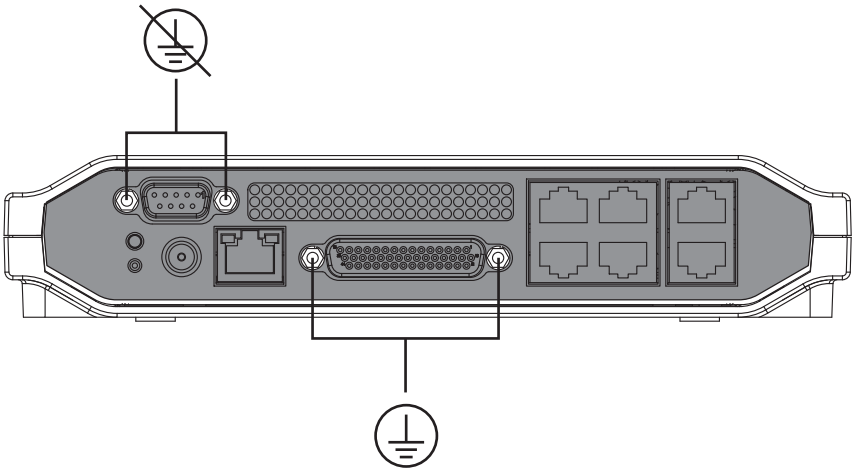
The chassis of the unit shall be reliably bonded to a protective ground. This can be accomplished by grounding the rack to a reliable electrical ground and firmly tightening all the rack mounting ear screws when the unit is mounted in the rack.

This equipment is intended to be operated with an adequately rated certified power supply cord suitable for the grounded/earthed receptacle. The power cord supplied by LifeSize meets this requirement

Special Notice for LifeSize Networker Installations

The following special notice applies to users installing LifeSize Networker in Norway, Finland, or Sweden. In accordance with the label on the equipment, a professional service person must install LifeSize Networker in a restricted access location. Examples of a restricted access location are a network equipment room, a wiring closet, or other locked equipment location not generally accessible to the public. The installer must ensure that exposed metal chassis on the rear of LifeSize Networker is permanently earthed to a reliable equipotential ground. Consult the following diagrams for suggested earthing connections. Ensure that LifeSize Networker is earthed before connecting TNV or power cables to the unit.

Note: Back panels may vary slightly depending on the release date of your unit.



Finland

Tärkeä ilmoitus tämän tuotteen asentajille Suomessa: Laitteiston tarran mukaisesti ammattilaisen huoltoasentajan on asennettava LifeSize Networker -laitteisto rajoitetun käytön paikkaan. Rajoitetun käytön paikkoja ovat esim. verkkolaitteiston huone, johdotushuone tai muu lukittu laitteiston paikka, johon yleisöllä ei ole pääsyä. Asentajan on varmistettava, että LifeSize Networkerin takana oleva paljas metallirunko on pysyvästi maadoitettu luotettavaan samapotentiaaliseen maahan. Tutki seuraavasta piirroksesta suositeltuja maadoitusliitäntäpaikkoja. Varmista, että LifeSize Networker on maadoitettu ennen kuin teleliikenteen verkkojännite tai virtakaapelit liitetään laitteeseen.

Norway

Spesiell merknad til brukere som installerer dette produktet i Norge: I samsvar med utstyrets merking må en profesjonell servicetekniker installere LifeSize Networker på et sted med begrenset adgang. Eksempler på steder med begrenset adgang kan være rom med nettverksutstyr, koblingsskap eller andre avlåste steder for plassering av utstyr, der uvedkommende ikke har adgang. Den som utfører installasjonen må sørge for at den eksponerte metallrammen på baksiden av LifeSize Networker er permanent jordet til et pålitelig jordingspunkt. Se følgende tegning for å få forslag til steder for jordforbindelse. Sørg for at LifeSize Networker er jordet før det tilkobles kabler for nettverk eller kraftforsyning til enheten.

Sweden

Meddelande till användare som installerar denna produkt i Sverige: I enlighet med märkningen på utrustningen måste en professionell servicetekniker installera LifeSize Networker på en plats med begränsad åtkomst. Exempel på platser med begränsad åtkomst är rum för nätverksutrustning, skåp för ledningar och kablage eller annat, låst utrymme som normalt ej är tillgängligt för allmänheten. Personen som installerar måste säkerställa att det exponerade metallchassit på baksidan av LifeSize Networker är permanent jordat till en pålitlig ekvipotentialjord. Följande diagram visar förslag till ställen för jordningsanslutning. Säkerställ att LifeSize Networker är jordad innan TNV- eller strömkablar ansluts till enheten.

Regulatory Notices

Part 68 Notice

When required, LifeSize products comply with Part 68 of the FCC rules and the requirements adopted by the ACTA. Part 68 compliance is indicated by a label on the bottom of this equipment that contains a product identifier in the format US: LSCXXXXXXX. If requested, this number must be provided to the telephone company. LifeSize equipment uses the following Universal Service Order Code (USOC) jacks.

LifeSize products use RJ-11 connectors for PSTN (POTS) service.

A plug and jack used to connect this equipment to the premises wiring and telephone network must comply with the applicable FCC Part 68 rules and requirements adopted by the ACTA. A compliant telephone cord modular plug is provided with this product. It is designed to be connected to a compatible modular jack that is also compliant. The telephone cord provided is made with 26 AWG wire. Use only 26 AWG wire telephone cords with this product.

The Ringer Equivalence Number (REN) is used to determine the number of devices that may be connected to a telephone line. Excessive RENs on a telephone line may result in the devices not ringing in response to an incoming call. In most but not all areas, the sum of RENs should not exceed five (5.0). To be certain of the number of devices that may be connected to a line, as determined by the total RENs, contact the local telephone company. The REN for the product is part of the product identifier that has the format US: LSCITXXBXXXX. The digits XXB are the REN without a decimal point (e.g., 00B is a REN of 0.0).

If this equipment causes harm to the telephone network, the telephone company will notify you in advance that temporary discontinuance of service may be required. If advance notice is not practical, the telephone company will notify the customer as soon as possible. Also, you will be advised of your right to file a complaint with the FCC if you believe it is necessary.

The telephone company may make changes in its facilities, equipment, operations or procedures that could affect the operation of the equipment. If this happens the telephone company will provide advance notice in order for you to make necessary modifications to maintain uninterrupted service.

If the equipment is causing harm to the telephone network, the telephone company may request that you disconnect the equipment until the problem is resolved.

LifeSize recommends that the customer install an AC surge arrestor in the AC outlet to which this device is connected to avoid damaging the equipment caused by local lightning strikes and other electrical surges.

The internal modem in LifeSize equipment will not work with party lines, cannot be connected to a coin-operated telephone, and may not work with a private branch exchange (PBX).

PSTN Support

For LifeSize Room and LifeSize Team/Team MP systems, LifeSize supports use of the PSTN feature in the following countries. Users in countries not on this list should check with their local authority before attempting to use the PSTN feature:

USA, Australia, Austria, Bahrain, Barbados, Belgium, Bolivia, Bulgaria, Canada, Cyprus, Czech Republic, Denmark, Ecuador, Estonia, Finland, France, Germany, Greece, Honduras, Hong Kong, Hungary, Iceland, India, Ireland, Italy, Japan, Latvia, Liechtenstein, Lithuania, Luxembourg, Malaysia, Malta, Mexico, Netherlands, New Zealand, Norway, Pakistan, Poland, Portugal, Qatar, Romania, Saudi Arabia, Singapore, Slovakia, Slovenia, South Korea, Spain, South Africa, Sweden, Switzerland, Taiwan, Turkey, United Arab Emirates (UAE), United Kingdom.

For LifeSize Room 200 and LifeSize Team 200 Systems, LifeSize supports use of the PSTN feature in the following countries. Users in countries not on this list should check with their local authority before attempting to use the PSTN feature:

USA, Australia, Austria, Barbados, Belgium, Bolivia, Bulgaria, Canada, China, Cyprus, Czech Republic, Denmark, Ecuador, Estonia, Finland, France, Germany, Greece, Honduras, Hong Kong, Hungary, Hong Kong, Iceland, India, Ireland, Italy, Japan, Korea, Latvia, Liechtenstein, Lithuania, Luxembourg, Malaysia, Malta, Mexico, Netherlands, New Zealand, Norway, Pakistan, Poland, Portugal, Qatar, Romania, Saudi Arabia, Singapore, Slovakia, Slovenia, Spain, Sweden, Switzerland, Taiwan, Turkey, United Kingdom, United Arab Emirates (UAE).

New Zealand Telepermit PSTN Notices for 200 Series Systems

PTC200 General Warning

The grant of a Telepermit for any item of terminal equipment indicates only that Telecom has accepted that the item complies with minimum conditions for connection to its network. It indicates no endorsement of the product by Telecom, nor does it provide any sort of warranty. Above all, it provides no assurance that any item will work correctly in all respects with another item of Telepermitted equipment of a different make or model, nor does it imply that any product is compatible with all of Telecom's network services.

PTC200 2.11.1 (6) & (7) Compliance Testing (functional tests)

This equipment is not capable, under all operating conditions, of correct operation at the higher speeds for which it is designed. Telecom will accept no responsibility should difficulties arise in such circumstances. This condition typically applies to 56 kbit/s modems and facsimile machines operating at >14.4 kbit/s.

PTC200: 1996 5.4.1 (2) General (decadic signalling)

This equipment must not be programmed for decadic (pulse) dialling because its characteristics are incompatible with the telephone exchanges in New Zealand. DTMF (tone) dialling is considerably faster and is fully compatible.

PTC200 6.3 (3) Off Hook D.C. line characteristics

This equipment may not provide for the effective hand-over of a call to another device connected to the same line.

PTC200 8.1.3 (2) 8.1.4 (b) & 8.2.1 Automatic Call Setup

Some parameters required for compliance with Telecom's Telepermit requirements are dependent on the equipment (PC) associated with this device. The associated equipment shall be set to operate within the following limits for compliance with Telecom's Specification:

- There shall be no more than 10 call attempts to the same number within any 30 minute period for any single manual call initiation
- The equipment shall go on-hook for a period of not less than 30 seconds between the end of one attempt and the beginning of the next call attempt.
- Automatic calls to different numbers are spaced such that there is not less than 5 seconds between the end of one call attempt and the beginning of another.
- Equipment shall be set to ensure that calls are answered within 3 and 30 seconds of the receipt of ringing

PTC200 8.1.7 (b) User Instructions (Automatic Call Setup)

This equipment shall not be set up to make automatic calls to Telecom's 111 Emergency Service.

CS-03 Notice

When required, this equipment meets the applicable Industry Canada Terminal Equipment Technical Specifications. This is confirmed by the registration number in the label. The abbreviation, IC, before the registration number signifies that registration was performed based on a Declaration of Conformity indicating that Industry Canada technical specifications were met. It does not imply that Industry Canada approved the equipment.

Notice: The Ringer Equivalence Number (REN) for this terminal equipment is 0.0B. The REN assigned to each terminal equipment provides an indication of the maximum number of terminals allowed to be connected to a telephone interface. The termination on a interface may consist of any combination of devices subject only to the requirement that the sum of the Ringer Equivalence Numbers of all the devices does not exceed five.

AVIS : Le nombre équivalent de sonneries (REN) affecté à chaque terminal indique le nombre maximal de terminaux qui peuvent être branchés à une interface téléphonique. L'équipement terminal d'une interface peut comporter toute combinaison d'appareils, à la condition unique que le nombre équivalent total des sonneries de tous les appareils ne dépasse pas 5. Le nombre équivalent des sonneries se trouve sur la base du modem.

LifeSize Networker Only

Standardized jacks are used to connect equipment to the telephone network. The following table contains the Facility Interface Code (FIC), Service Order Code (SOC), Ringer Equivalence (REN), and network jack information for LifeSize Networker:

Port Identifier	FIC	SOC	REN	Network Jack
T1	04DU9-1SN	6.0Y	NAN	RJ48C/CA-81A
BRI-ST	021S5	6.0N	NAN	RJ-48C/CA-81A
BRI-U	021S5	6.0N	NAN	RJ-49/CA-A11

Use of LifeSize Networker on a private leased line may require the user to file an encoded analog content and billing protection affidavit to the phone company. Check with the local phone company providing the leased line to confirm the requirements and to obtain instructions on the preparation and submission of an affidavit.

Electromagnetic Compatibility Notices

LifeSize products are designed, tested, and classified for their intended electromagnetic environment. To identify which class your product component complies with, refer to the product label on the back or bottom of the physical hardware unit. These electromagnetic environment classifications generally refer to the following harmonized definitions:

- Class A is typical for commercial, office, and industrial areas.
- Class B is typical for residential areas.

US FCC Class A Notice

For products listed as Class A, the following notice applies:

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment.

This equipment generates, uses, and can radiate radio frequency energy, and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

Modifying the equipment without LifeSize Communications' authorization may result in the equipment no longer complying with FCC requirements for Class A digital devices. In that event, your right to use the equipment may be limited by FCC regulations, and you may be required to correct any interference to radio or television communications at your own expense.

If you experience trouble with LifeSize equipment, for repair or warranty information, contact LifeSize Communications. There are no user serviceable parts in the equipment. Warning: Changes or modifications not expressly approved by LifeSize could void the user's authority to operate the equipment.

Notice: Shielded interface cables must be used in order to comply with emission limits. The cable supplied with the camera meets this requirement.

For LifeSize Networker Only

Compliance with FCC and similar EMI regulations requires the use of a shielded cable when this device is used with a PRI connection. Commercially available Cat 5 shielded twisted-pair (STP) patch cables are suitable to meet this requirement.

Industry Canada (IC) (Utilisateurs au Canada) Class A Statement

This digital apparatus does not exceed the Class A limits for radio noise emissions from digital apparatus set out in the interference-causing equipment standard entitled Digital Apparatus, ICES-003 of Industry Canada.

Le présent appareil numérique n'émet pas de bruits radio-électriques dépassant les limites applicables aux appareils numériques de la classe A prescrites dens le Règlement sur le brouillage radioélectrique édicté par l'Industrie. NMB-003.

Japan VCCI Class A Statement

This is a Class A product based on the standard of the Voluntary Control Council for Interference by Information Technology Equipment (VCCI). If this equipment is used in a domestic environment, radio disturbance may arise. When such trouble occurs, the user may be required to take corrective actions

これは、情報処理装置等電波障害自主規制協議会（VCCI）の規定に基づくクラス A 装置です。この装置を家庭環境で使用すると、電波妨害を引き起こすことがあります。この場合には、使用者が適切な対策を取るように要求されることがあります。

Taiwan BSMI Class A Statement

This is a Class A Information Product, when used in residential environment, it may cause radio frequency interference, under such circumstances, the user may be requested to take appropriate countermeasures.

這是甲類資訊產品，在居住環境中使用時，可能會造成射頻干擾，在這種情況下，使用者會被要求採取某些適當的對策。注意：產品的度量和檢驗標準 e 局 (BSMI) 核准授權號碼在系統外殼的產品標籤上。

D33724

China Class A Statement

When labeled with the CCC marking, the is product meets the applicable safety and EMC requirements for China.

This is a Class A product. In a domestic environment this product may cause radio interference, in which case the user may be required to take adequate measures.

此为 A 级产品，在生活环境中，该产品可能会造成无线电干扰。在这种情况下，可能需要用户对其干扰采取切实可行的措施。

Korean Class A Statement

This is a Class A device and is registered for EMC requirements for industrial use. If this type was sold or purchased by mistake, it should be replaced with a residential-use type.

A 급 기기 이 기기는 업무용으로 전자파 적합 등록을 한 기기이오니 판매자 또는 사용자는 이 점을 주의하시기 바라며 만약 잘못 판매 또는 구입하였을 때에는 가정용으로 교환하시기 바랍니다 .

Australia and New Zealand Statements

This product meets the technical requirements for sale and use in Australia and New Zealand.

N4292

Russia Statements

This product meets the requirements for sale and use in Russia.

ME06

European Community Class A ITE Notice

This is a class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.

US FCC Class B Notice

For products listed as Class B, the following notice applies:

This product meets FCC Class B requirements. This product is suitable for home or office use.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference.

2. This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Notice: Changes or modification not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

Industry Canada (IC) (Utilisateurs au Canada) Class B Statement

This digital apparatus does not exceed the Class B limits for radio noise emissions from digital apparatus set out in the interference-causing equipment standard entitled "Digital Apparatus", ICES-003 of the Canadian Department of Communications.

Cet appareil numérique respecte les limites bruits radioélectriques applicables aux appareils numériques de Class B prescrites dans la norme sur le matériel brouilleur: "Appareils Numériques", NMB-003 édictée par le Ministre Canadien des Communications.

Japan VCCI Class B Statement

This is a Class B product based on the standard of the Voluntary Control Council for Interference (VCCI) from Information Technology Equipment. If this is used near a radio or television receiver in a domestic environment, it may cause radio interference. Install and use the equipment according to the instruction manual.

この装置は、情報処理装置等電波障害目主規制協議会（VCCI）の基準
に基づくクラス B 情報技術装置です。この装置は、家庭環境で使用することを目的としていますが、この装置がラジオやテレビジョン受信機に近接して使用されると、受信障害を引き起こすことがあります。取扱説明書に従って正しい取り扱いをして下さい。

European Union CE Notice

Marking by the symbol CE indicates compliance of this LifeSize product to the R&TTE Directive and the Low Voltage Directive of the European Union. Such marking is indicative that this LifeSize product meets the following technical standards:

- EN 55022 — "Information Technology Equipment — Radio Disturbance Characteristics — Limits and Methods of Measurement."
- EN 55024 — "Information Technology Equipment - Immunity Characteristics - Limits and Methods of Measurement."

  Note: **Special Notice for using Power over Ethernet (PoE) to power LifeSize Networker**: To comply with EN61000-2-4 as specified in EN55024, you must connect a ground (earthing) wire to the ground (earthing) terminal on the rear panel of the LifeSize Networker unit when powering the unit using PoE, such as when LifeSize Networker is connected to a LifeSize Room. This connection is not required if powering the unit using the optional AC/DC adapter.
- EN 61000-3-2 — "Electromagnetic Compatibility (EMC) - Part 3: Limits - Section 2: Limits for Harmonic Current Emissions (Equipment Input Current Up to and Including 16 A Per Phase)."
- EN 61000-3-3 — "Electromagnetic Compatibility (EMC) - Part 3: Limits - Section 3: Limitation of Voltage Fluctuations and Flicker in Low-Voltage Supply Systems for Equipment With Rated Current Up to and Including 16 A."
- EN 60950 — "Safety of Information Technology Equipment."

Declaration of Conformity with Regard to the R&TTE Directive 1999/5/EC

English: This equipment is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC.

Deutsch (German): Dieses Great entspricht den grundlegenden Anforderingen und den weiteren entsprechenden Vorgaben der Richtlinie 1999/5/EU.
