New Features

Following are the major new features in this release.

- LifeSize ClearSea Client includes language support for English, German, French, Italian, Japanese, Korean, Russian, Spanish, and Simplified and Traditional Chinese.
- LifeSize ClearSea Client supports automatic discovery of the optimal cluster node in configurations with LifeSize ClearSea Server v3.0 or later. The optimal cluster node reduces delays and packet loss on all platforms.
- Desktop versions of LifeSize ClearSea Client support the G.722.1 audio codec.
- Android and iOS versions of LifeSize ClearSea Client support the H.239 protocol (for receive transmissions only).
- LifeSize ClearSea Client includes the following improvements on Android devices:
  - Support of OMAP-based devices.
  - Improved support for Tegra 2 with Honeycomb and Ice Cream Sandwich, supporting resolutions up to 720p30.
  - Video quality improvements for Ice Cream Sandwich devices.
  - Support for the hardware echo canceller on compatible Honeycomb and Ice Cream Sandwich Android devices.

Resolved Issues

Following are the major resolved issues in this release. Numbers in parentheses are used for internal tracking.

- The call history now groups entries correctly on the LifeSize ClearSea Client desktop. (MC-92)
- Logging out of LifeSize ClearSea Client no longer generates an error after completing the logout. (MC-100)
- Video no longer freezes on the LifeSize ClearSea Client desktop in calls with a Tandberg/Cisco EX60 system registered to a Tandberg/Cisco VCS. (MC-103)

April 29, 2012

- When LifeSize ClearSea Client on iOS is idle, it no longer logs out of LifeSize ClearSea Server. (MC-109)
- LifeSize ClearSea Client on Mac OS X systems no longer fails on startup. (MC-125)

Interoperability

LifeSize ClearSea Client is supported on the following operating systems:

- Android v2.1 or later
- iOS v4.2 or later
- Mac OS X 10.5 or later
- Windows XP, 2003, Vista, 7
