Release Notes

LifeSize UVC Access

Release v1.0.0

Known Issues 1
Browser Support 1
Interoperability 2
Contacting Technical Services 2

For the latest product documentation, refer to lifesize.com/support.

Known Issues

Following are known issues and workarounds, if available. Numbers in parentheses are used for internal tracking.

- Current calls are disconnected when you add a H.323 route. **Workaround:** Add H.323 routes when no calls are connected. (LSGK-231)
- SNMP trap receiver settings are deleted when you restart UVC Access or the UVC platform. You must re-enter the trap receiver address manually. (LSGK-227)
- The SNMP trap from UVC Access incorrectly identifies the source of the trap as the UVC platform IP address. (LSGK-226)
- Syslog packets from UVC Access list the UVC platform IP address instead of the UVC Access IP address. (LSGK-159)
- You can specify only one SNMP trap receiver for UVC Access. (LSGK-67)

Browser Support

The LifeSize Access interface is supported with the following web browsers:

- Mozilla Firefox v3.0.0 or later
- Microsoft Internet Explorer v6.0 or later
- Google Chrome v8.0 or later
