An all-in-one video management application designed to save IT time and resources

LifeSize® UVC Manager™

LifeSize UVC Manager helps video administrators efficiently manage, monitor, schedule and upgrade complex video conferencing infrastructure and endpoints in their own networks and in remote networks behind firewalls or NAT boundaries.

Simplification for Administrators and End Users

Intelligent automation tools address key video management functions in a simple, straightforward manner, providing 24/7 oversight and significant savings in time and resources. LifeSize UVC Manager comes with a free management proxy, so IT administrators can manage their video devices behind firewalls and NATs. Its Smart Scheduler software and Automatic Call Establishment free administrators from manual scheduling, configuration and upgrades. A proactive alarm management system keeps administrators informed with on-the-go email alerts and graphical reports. LifeSize UVC Manager also features a variety of reporting functions that provide statistics for ROI tracking.

Accelerate Time-Intensive Tasks

LifeSize UVC Manager provides efficient control of LifeSize® UVC Transit™ to deliver automatic account provisioning and accurate call planning, thus easing time-intensive challenges associated with NAT and firewall traversal deployments for IT administrators.

LifeSize® UVC Platform™

LifeSize UVC Manager is part of the LifeSize UVC Platform, the simplest, most flexible way to get your video infrastructure up and running. For a free 30-day trial of LifeSize UVC Manager or any LifeSize UVC application, visit the LifeSize website.

LifeSize UVC Manager At-a-Glance

Free LifeSize UVC Manager Proxy	Manage video devices behind firewalls and NATs in remote offices
Fast, Easy Scheduling	Schedule multiparty, point-to-point or recorded conferences
Graphical Reporting	Graphical reports delivered on demand or scheduled to your inbox
Global Directory Services	Automated registration and global directory
Secure	Standards-based access and end-to-end encryption
Smart Scheduler	Automatic resource allocation based on scheduling demands
Plugin-free Microsoft® Exchange® Integration	Schedule video calls through your default calendar application on any device
Web Scheduler	Access the meeting scheduler from any web page
Flexible Licensing	Scale as your needs grow

System Components

Delivered via LifeSize UVC Platform:

- Rack-mountable LifeSize UVC hardware options
- LifeSize UVC virtual machine software (VMware® or Microsoft® Hyper-V®)

Based on security-hardened Linux® OS

Available as Standard Edition

Compatibility

Works with most LifeSize infrastructure products and supports tight integration with LifeSize video systems (see release notes for details)

Flexible Licensing

Ability to add capacity

Free trial: Up to 20 seats

Web-Based Interface

All-in-one, easy-to-use, web-based interface for monitoring your video network

Dashboard home screen provides snapshots of the entire video infrastructure

Multilingual web user interface (10 languages)

Video Management Suite

Discover, manage and monitor video systems and infrastructure from LifeSize

Manages H.323, H.320 and SIP-based LifeSize systems

Supports large-scale scheduled and ad hoc upgrades of video endpoints

SNMP trap management

Add non-LifeSize devices as external devices so that these are available for call scheduling

HTTPS based API support

Real-Time Alarms, Filter & Work Flow

Monitors key events through SNMP traps—authentication failures, software upgrades, ad hoc calls and various other network activities of video systems

Enables notification of technicians via email

Allows creation of multiple logical networks; assign admin per network location

Smart Scheduler

Support plugin-free integration with Microsoft Exchange server 2010 SP1 and Microsoft Exchange server 2007 SP3

Rich calendar interface to visualize video calls & upgrade schedules

Embed LifeSize UVC Manager's calendar into any web page

Use any calendar application on any device to schedule video calls

Simple web scheduler to easily set up video calls

Resolves capacity conflicts

Intelligent resource scheduling for bandwidth and quality optimization

Managed network video recorder is automatically picked based on network of video devices—provides easy-to-set-up recording/streaming session

Add video devices on the fly that need to be part of the call

Invite via IP, ISDN, e.164 or SIP addresses

MCU prefix support

Auto-selects MCU if needed for a video call

View free and busy schedules of all devices while scheduling calls or upgrades

Ability to change meeting host while scheduling a video call

System Groupings & Directories Services

Assign video systems and infrastructure to logical groups for group-based management

Address book management

Standards-based H.350 user directory

Support for LDAP and Active Directory environments

Live Events Manager

Add participants, drop participants and terminate the call

Show call statistics for each system

View live snapshots of current conference

Mute on/off function

Enable/disable Do Not Disturb

Live packet loss and jitter monitoring

Monitor ongoing video calls and upgrades in a specific network

View details of completed calls/upgrades

Reporting

Prepackaged video network reports

Usage, inventory, diagnostic and reporting on call detail records (CDR)

Graphical and data reports by year, month, week and day

API access for call detail records

One-button export of data

Real-time reports generated from CDRs

Unlimited report subscriptions delivered to your inbox

Security

Secure access methods include SSL, SSH and SNMP

SMTP support for email alerts

Active Directory or LDAP authentication for admin account management

Supports gatekeeper registrations as part of device provisioning

HTTPS-based web access

Ability to lock down services for maintenance activities

Supports deployment in DMZ or private LAN

LifeSize UVC Manager Proxy*

Free software that works with LifeSize UVC Manager server to allow seamless monitoring of video systems behind firewall/NAT boundaries

Makes LifeSize UVC Manager more scalable

Unlimited number of LifeSize UVC Manager proxies can connect to a single LifeSize UVC Manager server

LifeSize UVC Virtual Machine, Capacity, Hardware Configuration, Storage & Environmental Data

Please refer to the LifeSize UVC applications datasheet for details.

Virtualization Support

Microsoft® Hyper-V®

vmware® READY

* LifeSize UVC Manager and LifeSize UVC Manager Proxy cannot be deployed on the same instance.
