

LifeSize Video Communications Systems: Screen Layouts Software Release v4.0.0

This document presents a visual depiction of the screen layouts that are available during a video conference with a LifeSize video communications system. The total number of screen layouts that are available during a call depends on the number of connected callers, whether a single display or a dual display is used, and whether a presentation is in progress. The number of the selected screen layout (x) and the total number of screen layouts that are available (y) appear in the center of the screen above the status bar as x/y when the user interface is visible.

Screen layouts appear as one of the following types:

- A far end participant appears as the largest video image.
- Your site (the near end participant) appears as the largest video image.
- All video images from all participants are the same size.
- A presentation appears as the largest video image.

LifeSize systems that support multiway video calls can show video from a maximum of four callers: three far end participants and the near end participant. During a multiway video call, if you choose a screen layout that assigns video from a far end participant to the largest window, video from the far end participant who is currently speaking appears in that window. Near end video does not change location when a participant at the near end is the current speaker. If you choose a screen layout that shows all video images the same size, only the dominant speaker icon  moves to indicate which participant is currently speaking.

If your LifeSize system supports more than four video participants in a call, by default the video image from a fifth or sixth participant appears in the display only when that participant becomes the current speaker and replaces the video image of the earliest of the last three far end speakers. If an administrator has configured the system to show video only from the last speaker in the call, then only the video image from the participant who is currently speaking appears in the display. If a participant at your site is currently speaking, video from the last speaker appears in your display.

If your LifeSize system is a far end participant in a multiway call that is hosted by a third party system, the screen layouts available are the same as those available in a two-way call. If the system hosting the call is another LifeSize system running software release v3.0 or later, you can manage the layout of video from all participants in the call. In this case, the video images that appear in your display in a 5- or 6-way call include the participant hosting the call, the last two far end speakers, and near end video from your system.

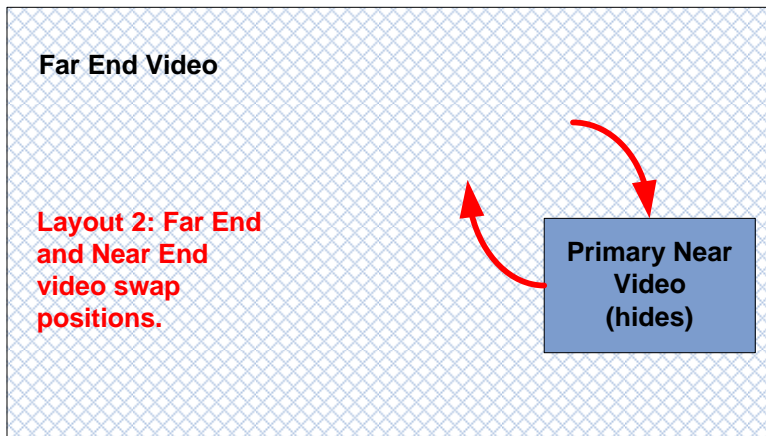

Screen layouts for LifeSize systems that support a single display begin on page 2; layouts for systems that support and are connected to two displays begin on page 14. The layouts shown for two displays are available when the **Display 2 Layout** preference in **Administrator Preferences : Appearance : Layout** is set to *Calls + Presentations + VGA Input* (LifeSize Room) or *Calls + Presentations + DVI-I Input* (LifeSize Room 200 and LifeSize Team 200). For more information about options available for the **Display 2 Layout** preference and the effect on screen layouts, refer to the Installation Guide for your LifeSize video communications system. A video image that hides when the user interface hides appears in this document with (hides) in the image description.

For more information about selecting a screen layout, refer to the *LifeSize Video Communications Systems User Guide*.

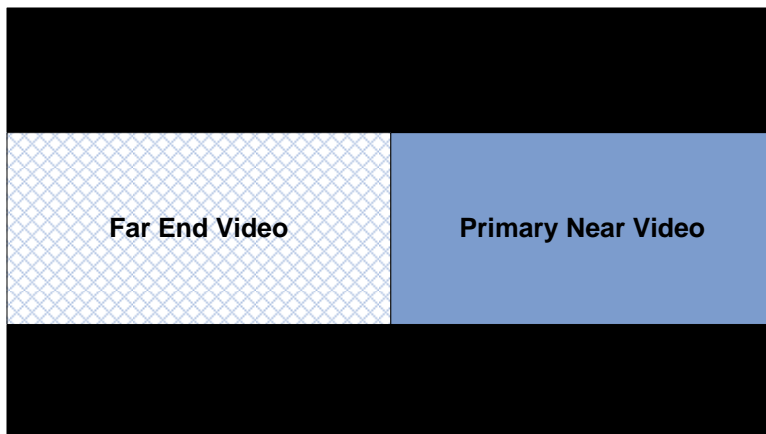

Single Display Screen Layouts

2-way Call (3 screen layouts)

Layouts 1 and 2

Layout 3

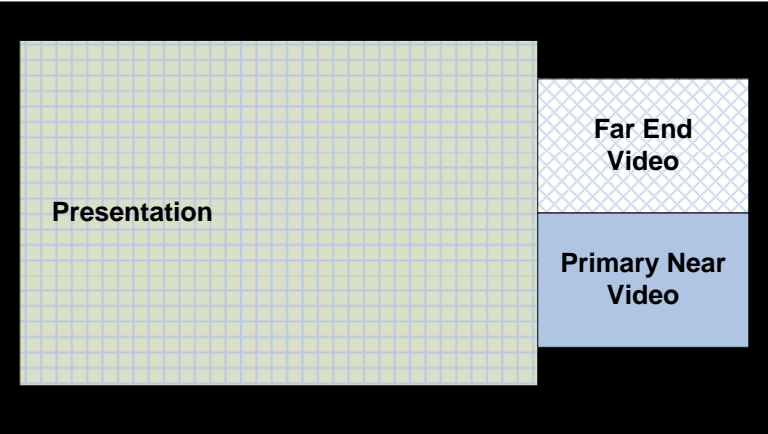

Single Display Screen Layouts

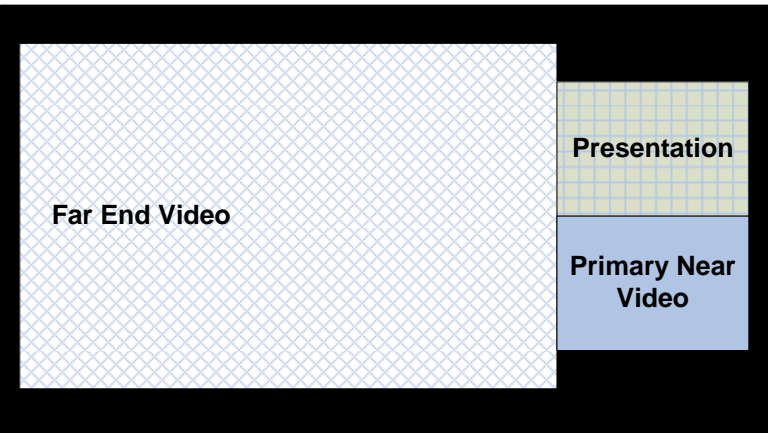

2-way Call with a Presentation

(7 screen layouts)

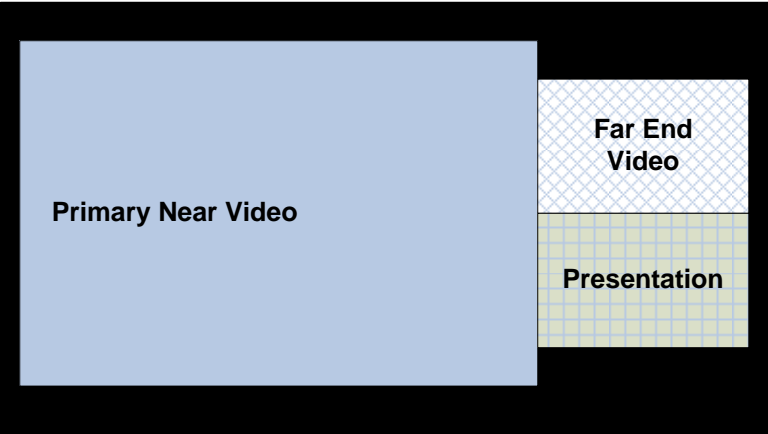

Layout 1

Layout 2

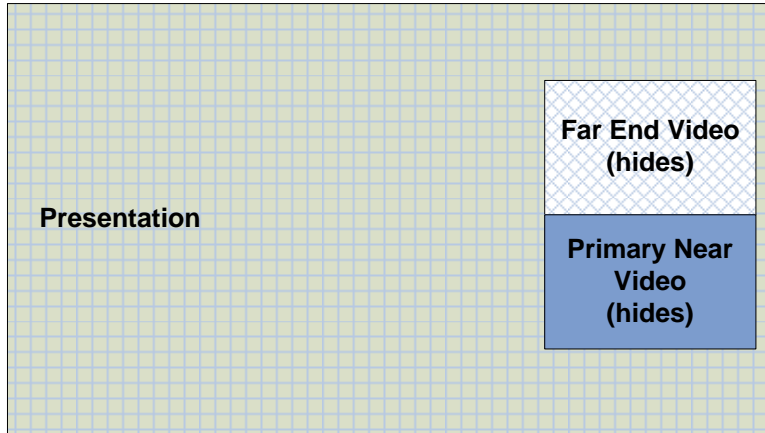

Layout 3

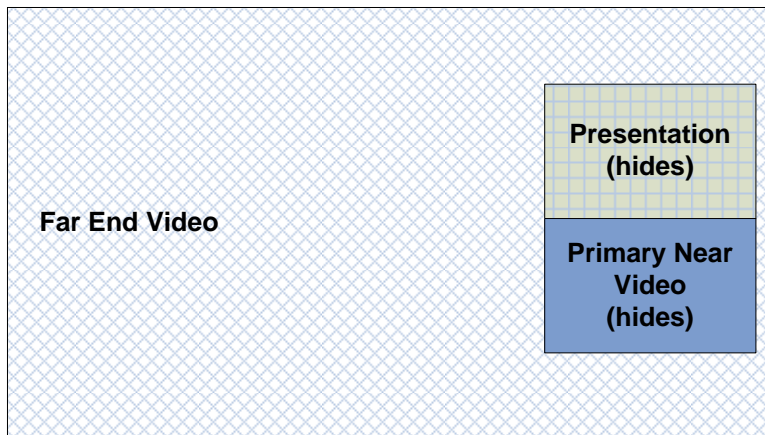

2-way Call on a Single Display with a Presentation (continued)

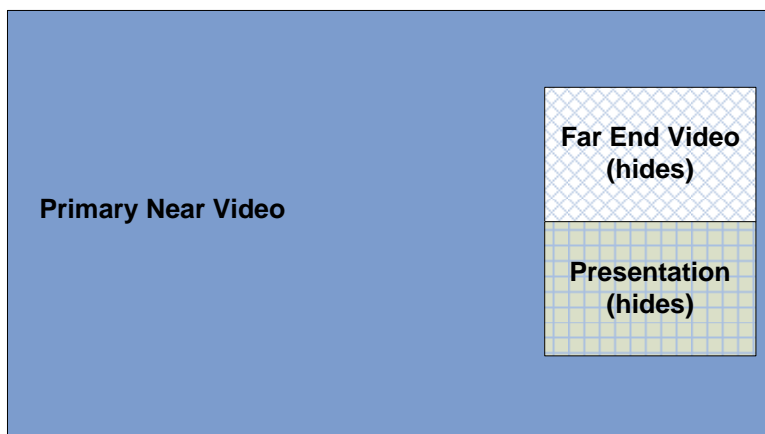

Layout 4

Layout 5

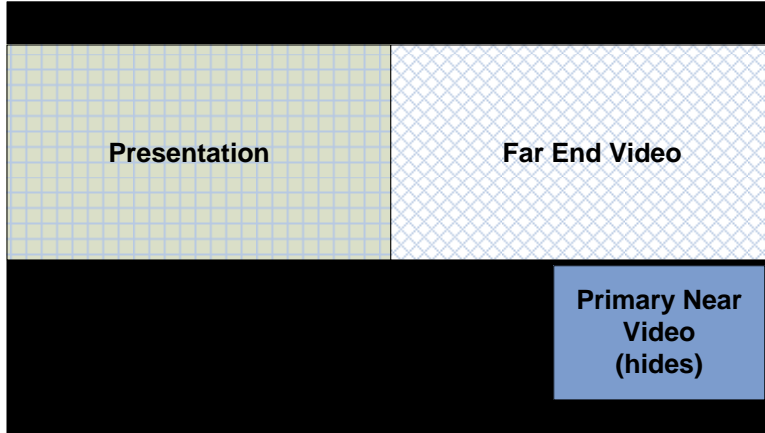

Layout 6

2-way Call on a Single Display with a Presentation (continued)

Layout 7

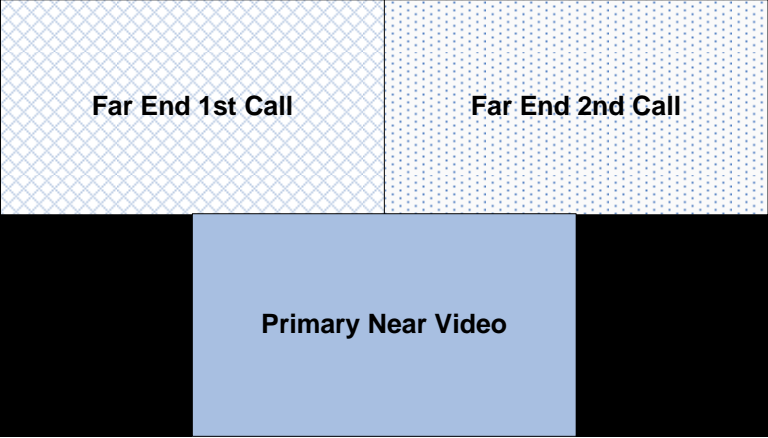

Single Display Screen Layouts

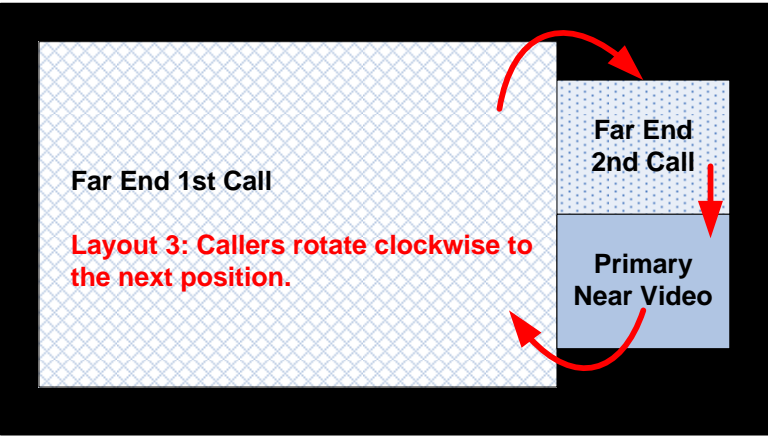

3-way Call

(5 screen layouts)

Layout 1

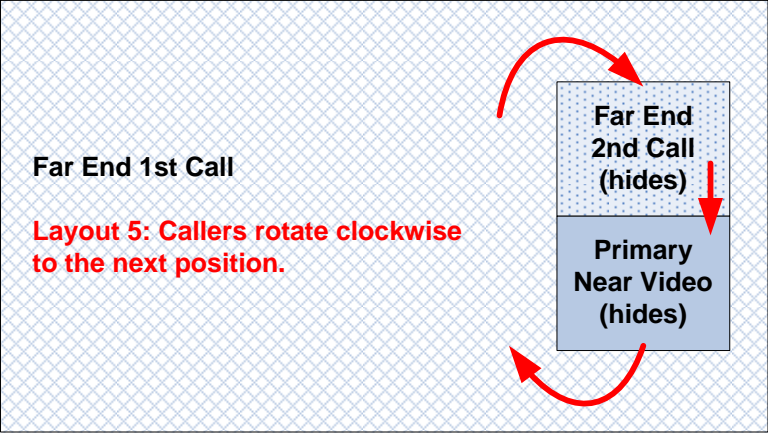

Layouts 2 and 3

Note: If you choose layout 2, video from the far end participant who is currently speaking appears in the largest window.

Layouts 4 and 5

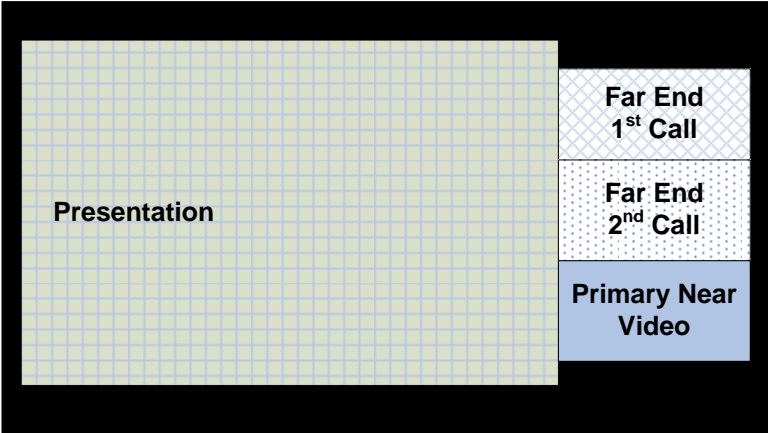

Note: If you choose layout 4, video from the far end participant who is currently speaking appears as the full-screen image.

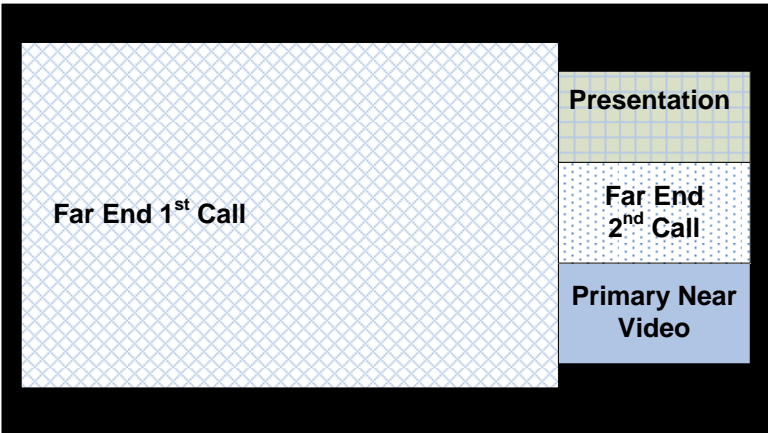

Single Display Screen Layouts

3-way Call with a Presentation (7 screen layouts)

Layout 1

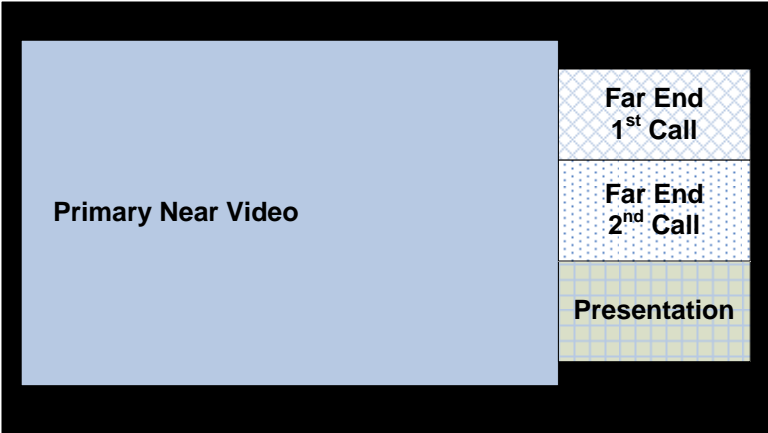

Layout 2

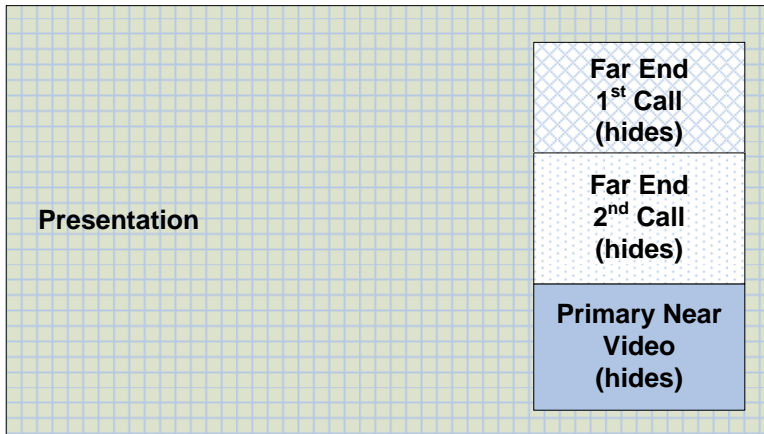

Note: If you choose layout 2, video from the far end participant who is currently speaking appears in the largest window.

Layout 3

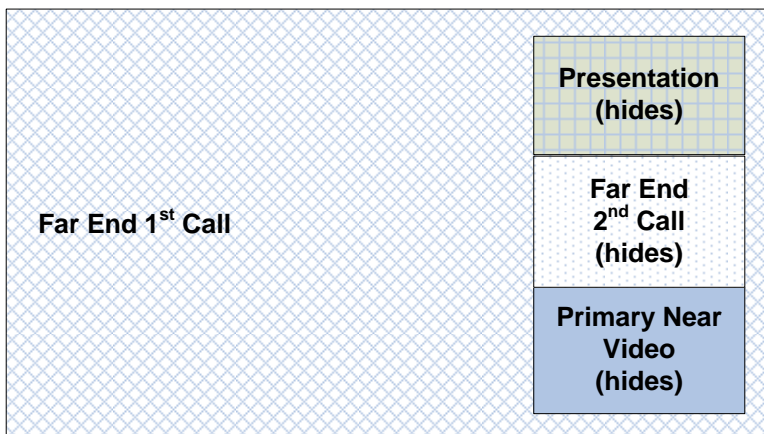

3-way Call on a Single Display with a Presentation (continued)

Layout 4

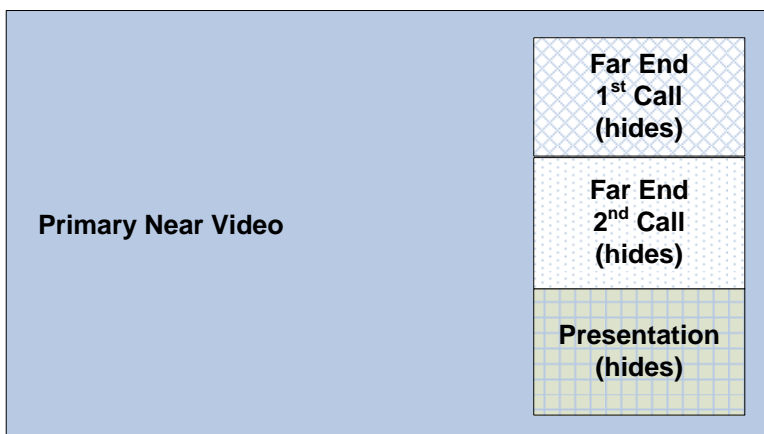

Layout 5

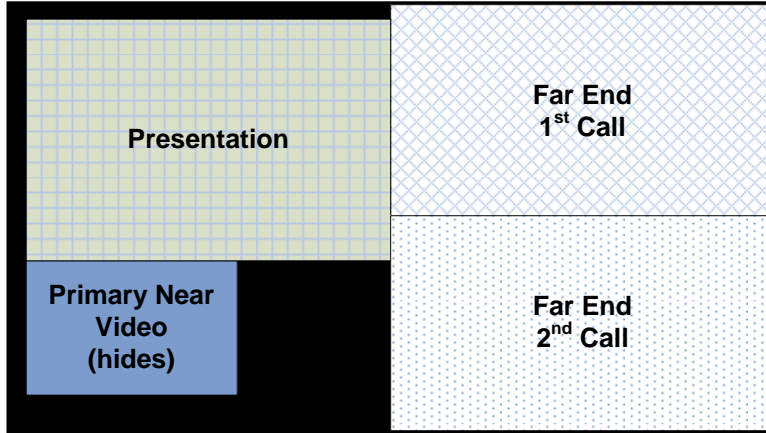

Note: If you choose layout 5, video from the far end participant who is currently speaking appears as the full-screen image.

Layout 6

3-way Call on a Single Display with a Presentation (continued)

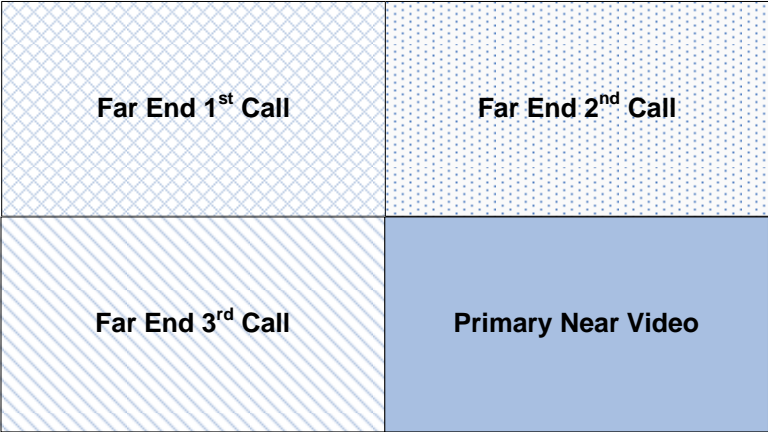

Layout 7

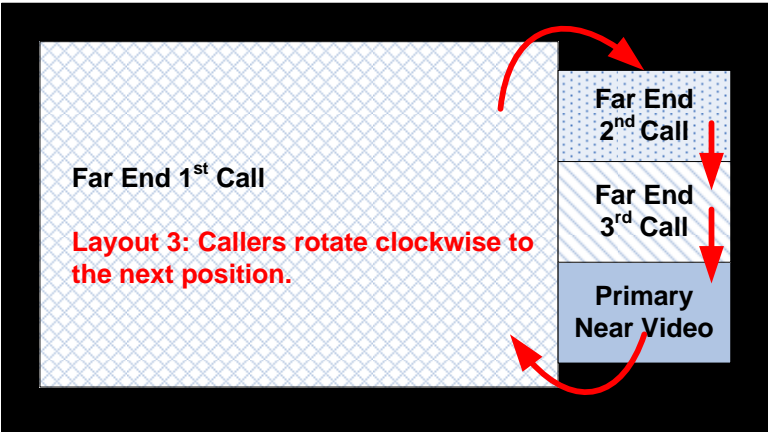

Single Display Screen Layouts

4-way Call (5 screen layouts)

Layout 1

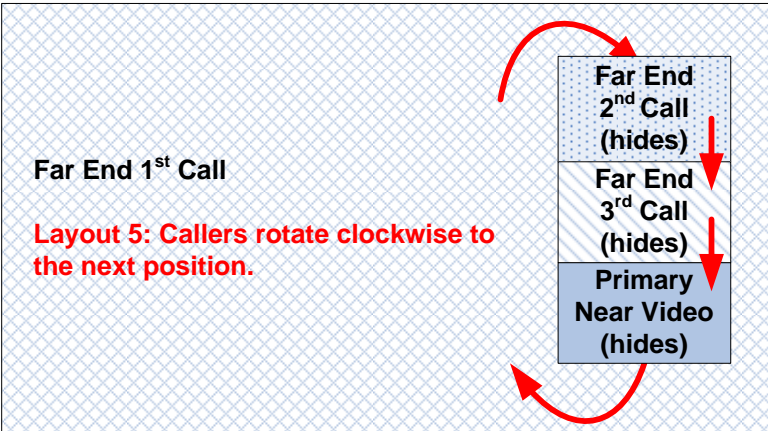

Layouts 2 and 3

Note: If you choose layout 2, video from the far end participant who is currently speaking appears in the largest window.

Layouts 4 and 5

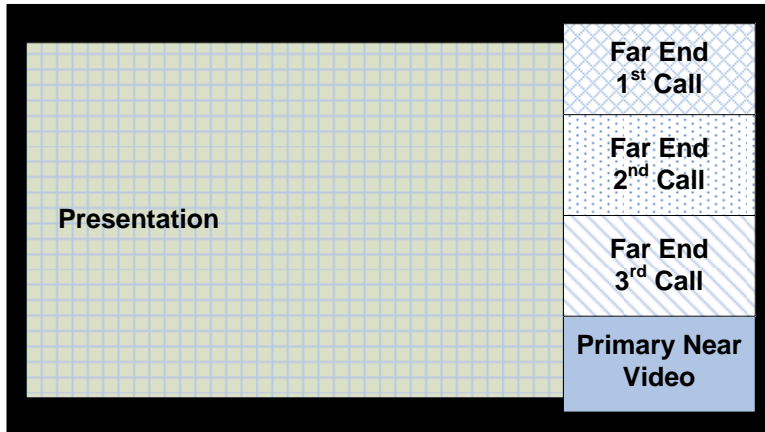

Note: If you choose layout 4, video from the far end participant who is currently speaking appears as the full-screen image.

Single Display Screen Layouts

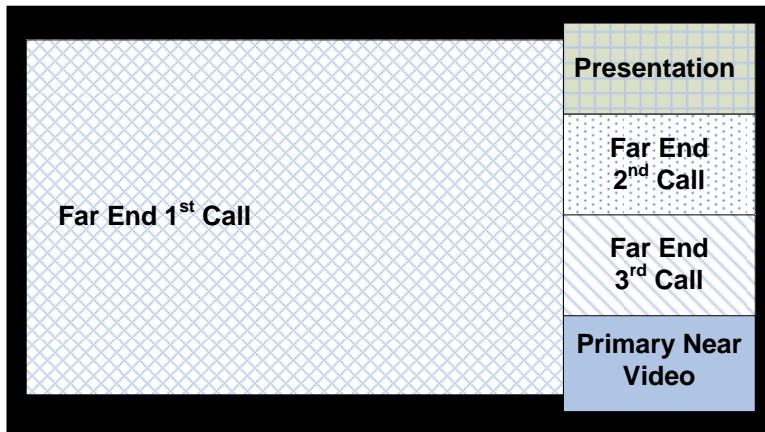

4-way Call with a Presentation

(7 screen layouts)

Layout 1

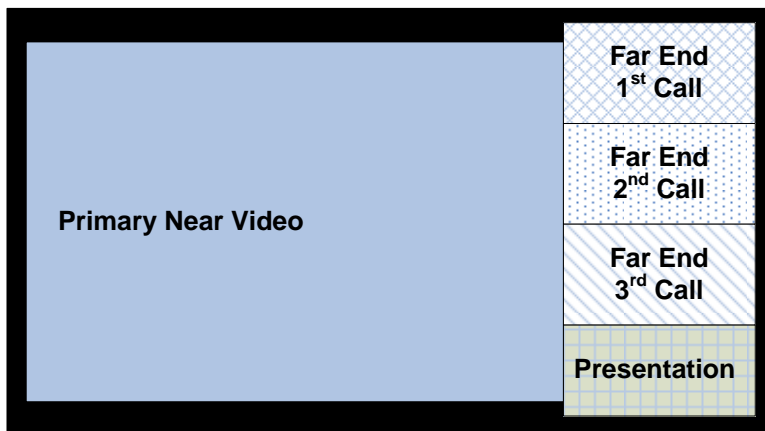

Layout 2

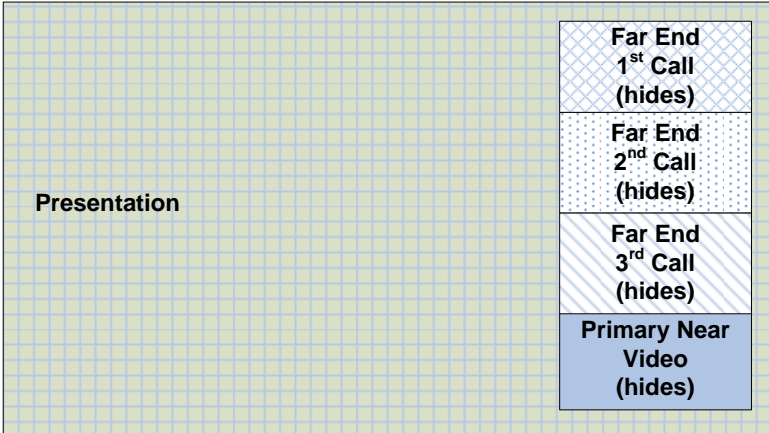

Note: If you choose layout 2, video from the far end participant who is currently speaking appears in the largest window.

Layout 3

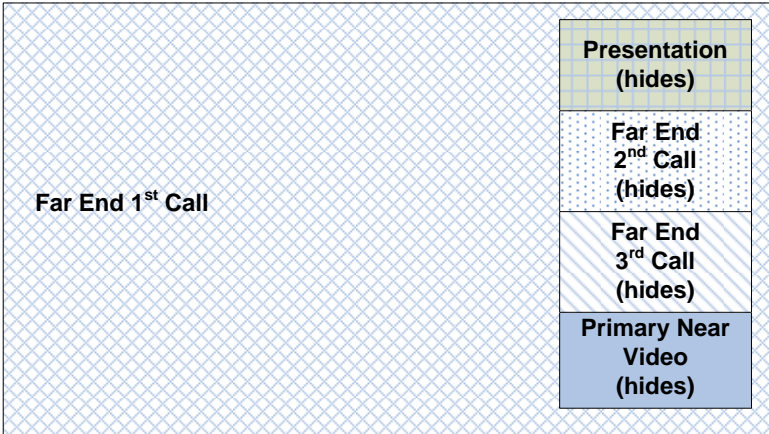

4-way Call on a Single Display With a Presentation (continued)

Layout 4

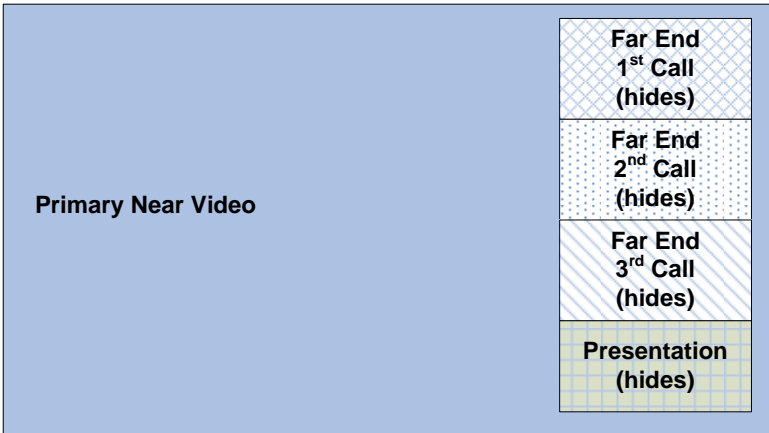

Layout 5

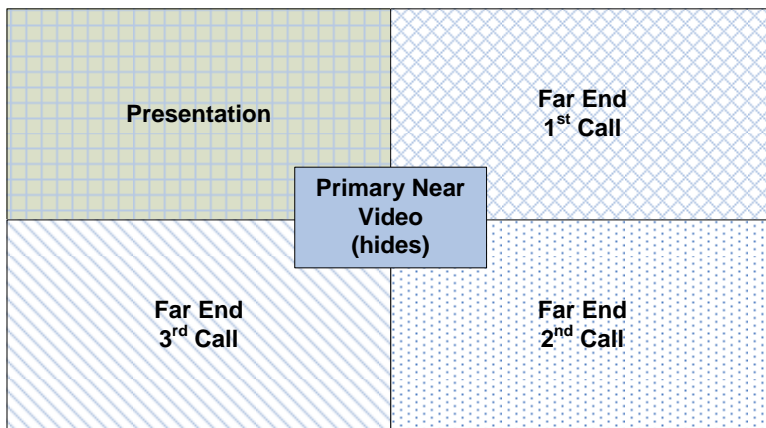

Note: If you choose layout 5, video from the far end participant who is currently speaking appears as the full-screen image.

Layout 6

4-way Call on a Single Display With a Presentation (continued)

Layout 7

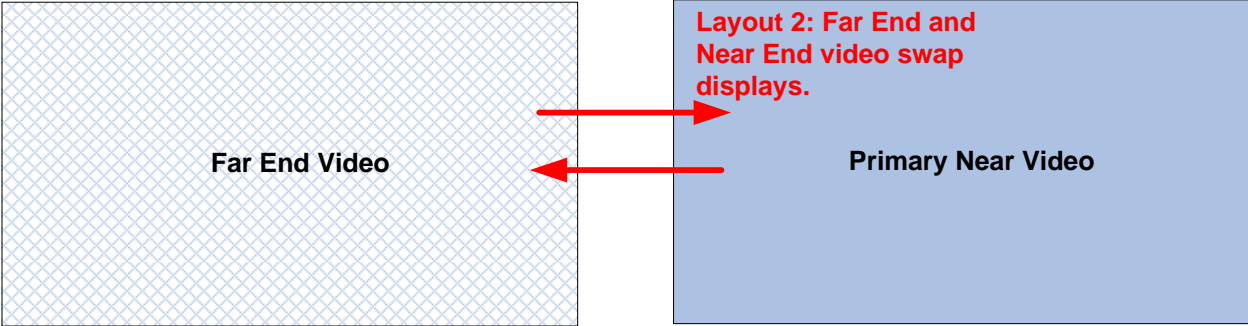

Dual Display Screen Layouts

2-way Call

(2 screen layouts)

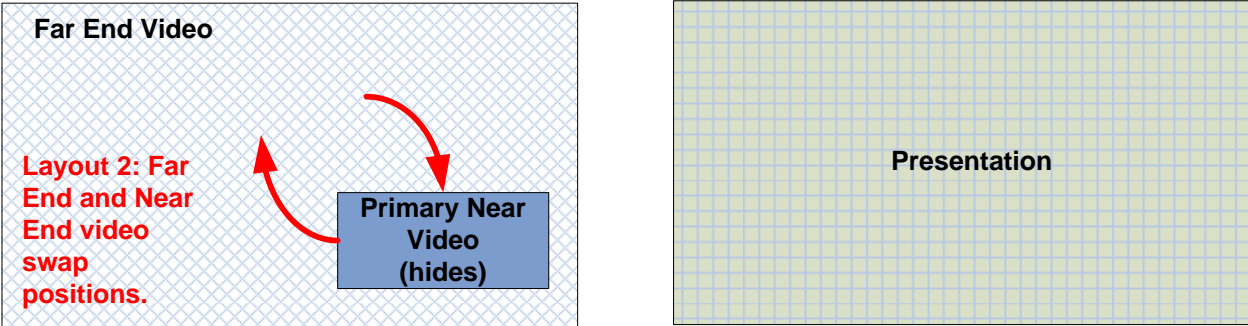

Layouts 1 and 2

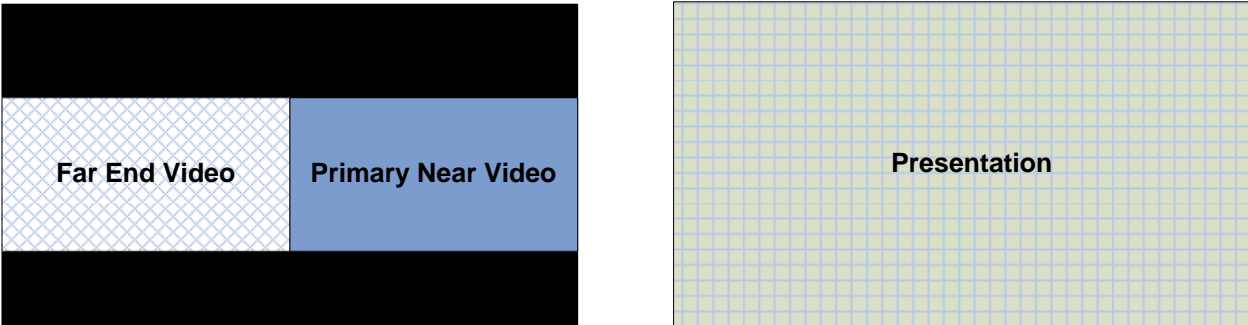

2-way Call with Presentation

(3 screen layouts)

Layouts 1 and 2

Layout 3

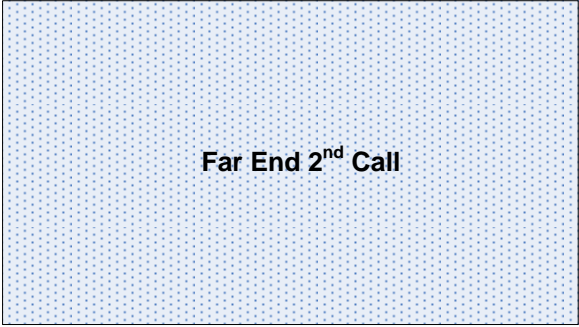

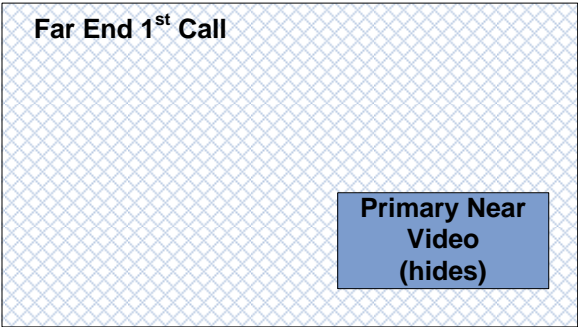

Dual Display Screen Layouts

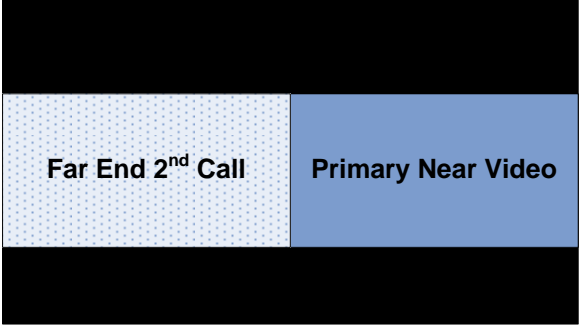

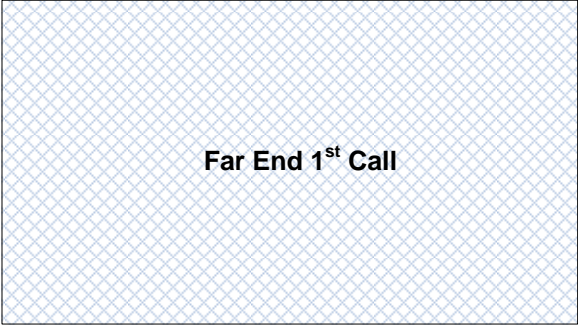

3-way Call

(3 screen layouts)

Layout 1

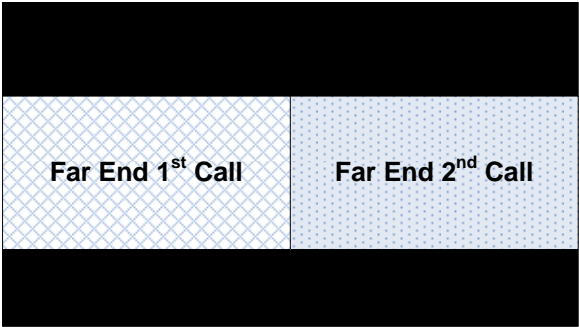

Layout 2

Note: If you choose layout 2, video from the far end participant who is currently speaking appears in the first display.

Layout 3

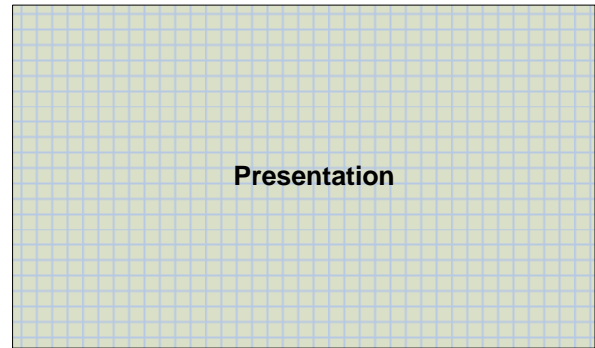

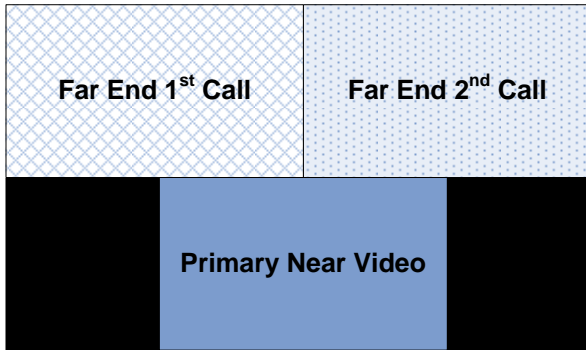

Dual Display Screen Layouts

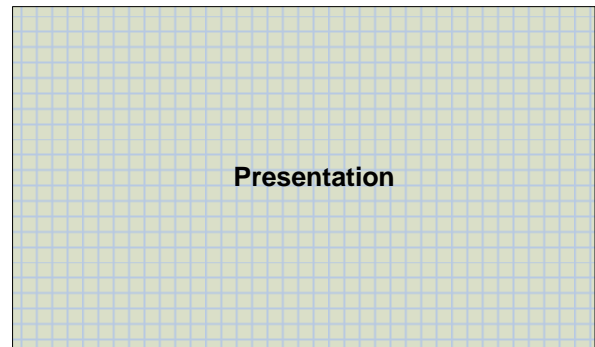

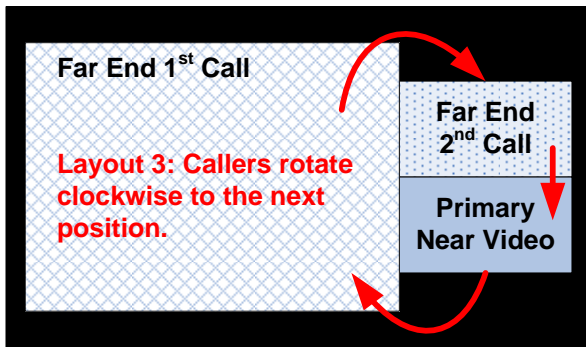

3-way Call with a Presentation

(5 screen layouts)

Layout 1

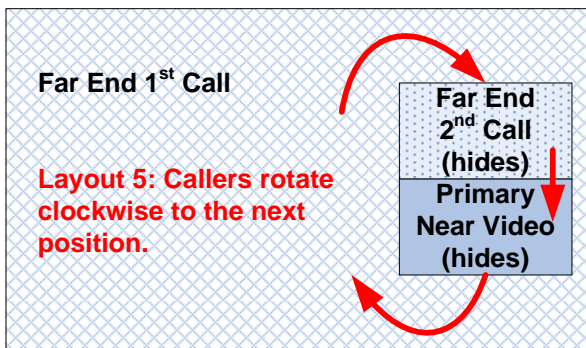

Layouts 2 and 3

Note: If you choose layout 2, video from the far end participant who is currently speaking appears as the largest image in the first display.

Layouts 4 and 5

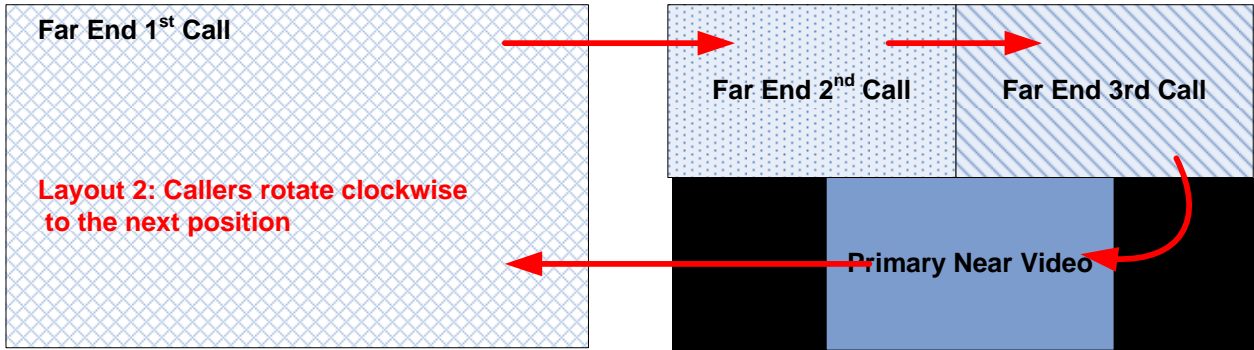

Note: If you choose layout 4, video from the far end participant who is currently speaking appears as the full-screen image in the first display.

Dual Display Screen Layouts

4-way Call

(2 screen layouts)

Layouts 1 and 2

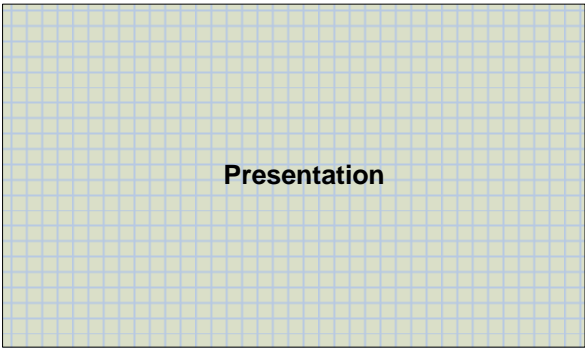

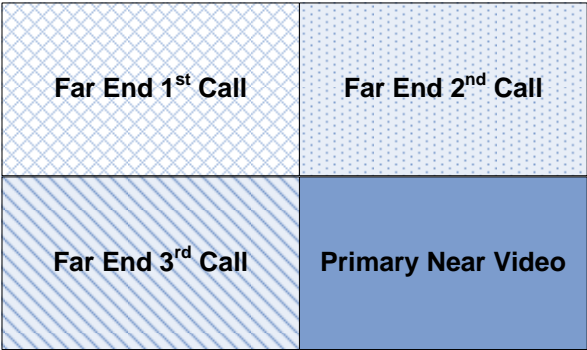

Note: If you choose layout 1, video from the far end participant who is currently speaking appears in the first display.

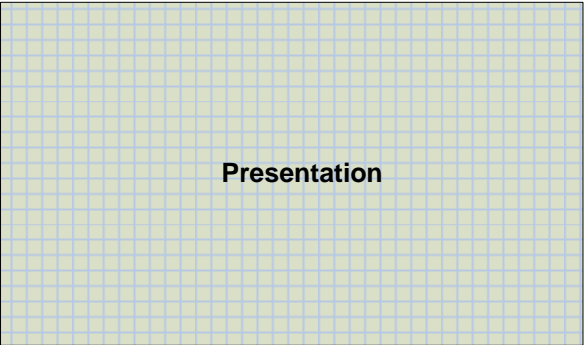

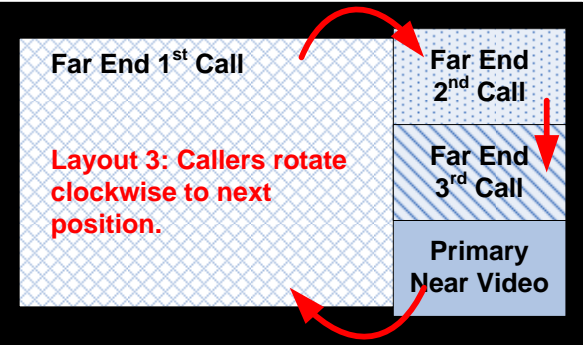

Dual Display Screen Layouts

4-way Call with a Presentation (5 screen layouts)

Layout 1

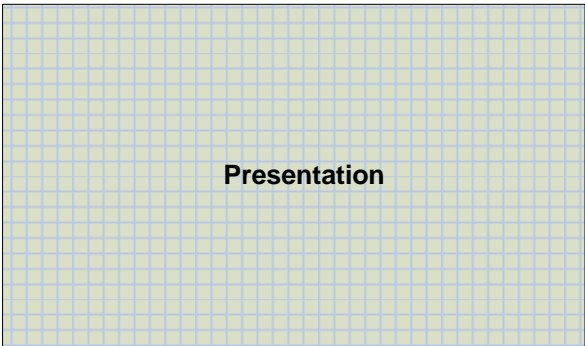

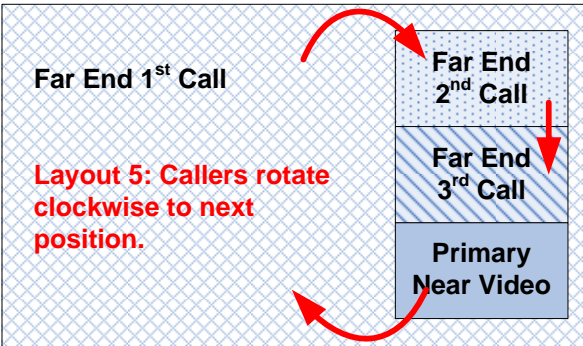

Layouts 2 and 3

Note: If you choose layout 2, video from the far end participant who is currently speaking appears as the largest image in the first display.

Layouts 4 and 5

Note: If you choose layout 4, video from the far end participant who is currently speaking appears as the full-screen image in the first display.
