Release Notes

**Lifesize Icon
Release v2.2.2**

For more information about your Icon system, click here.

Important! Lifesize highly recommends that you change the default password for administrators and support users for security purposes as well as to avoid system errors.

What's New

■ When Icon is integrated with UVC ClearSea, you can now add contacts and meetings to your Favorites list. (PKS-8144)

■ Moderators can mute all participants in a conference by toggling the **Mute All** button. The moderator that enables this is still audible unless he mutes his microphone. This feature is available only in virtual meeting rooms for Icon systems connected to Cloud. Refer to the Cloud online help to learn more about virtual meeting rooms. (PKS-8071)

■ Moscow time zones have been corrected. (PKS-8121)

Known Issues

Following are known issues and their workarounds, if available. Numbers in parentheses are for internal tracking.

- When starting or stopping recording during a call, the audio output switches to the Audio Call output instead of Video Call output, even if there are video connections remaining. (PKS-7744)

- Issues with layouts automatically switching may occur. (PKS-7821)

- Meetings may display under the Directory tab when connected to Cloud. (PKS-8378)

- Favorites list entries are not cleared from the phone after selecting Remove All. (PKS-8199)

- Unable to delete the Recents list on the phone. (PKS-7933, 8100)

- Timezone offset may be incorrect for Russia. (PKS-8121)

- Camera presets do not reflect the digital zoom position. (PKS-8187)

- Video Statistics do not appear in the web administration interface when the first call is audio only. (PKS-8214)

- UVC Manager v1.3 and earlier is unable to manage Lifesize Icon 400 systems.

- Icon does not show the recording indicator when showing the presentation layout. (PKS-7707)

- Adding a call from Internet Explorer v11 may result in a delayed response. **Workaround:** Use another supported browser. (PKS-7084)

- Disabling CEC may fail. (PKS-7027)

- Some secondary displays may be unable to go to sleep mode. (PKS-6190)

- Changing **Video Call Output** in the web interface fails if a call is in progress. The setting for **Voice Call Output** controls the active speaker for both video calls and voice calls. **Workaround:** Change the value prior to a call starting or use the value set for **Voice Call Output** for video also. (PKS-7156)

- Presentations are not supported in SIP calls that use UDP and are placed through Lifesize UVC ClearSea. **Workaround:** Use TCP for SIP calls that are placed through Lifesize UVC ClearSea. (PKS-5687)

- Input selectors from the web interface for Icon 800 are not available. **Workaround:** Select inputs from the main UI. (PKS-7173)

- Locking the camera position from the web interface for Icon 800 may not take effect. (PKS-7172)

- Refreshing the license page from the main screen may not correctly update values in the web interface. **Workaround:** Click **Refresh** on the web interface to show the latest data. (PKS-7117)

- Lifesize Icon 800 only recognizes Lifesize Cameras as the primary input. If you are using a Visca camera as the primary input (DVI 1), the system is unable to recognize it.   (PKS-7343)

Interoperability

This release supports the following third party products.

Browser support	Windows 7
	    Internet Explorer 11, 10
	    Firefox 29, 28, 27
	    Chrome 34, 33, 32
	Mac OSX 10.9 (Mavericks)
	    Chrome 34, 33, 32
	    Firefox 29, 28, 27
	    Safari 7.0.3

USB serial port adapters	Trendnet TU-S9 Plugable pl2303 Belkin F5U409 Microconectors E07-160C, single Insignia NS-PU99501 Gearmo FTDI-LED ATEN UC-232A SABRENT CB-FTDI Tera Grand USB2-VE487-TG TrippLite-Keyspan U209-000-R
Cisco/Tandberg	Cisco SX20: V8.2 Tandberg C Series: TC 4.2.3
Polycom	HDX Series: 3.0.4 Group 300: 4.0.2 Group 500: 4.0.2
