

# Lifelike video conferencing for natural collaboration.

Lifesize helps people transcend physical barriers to transform their business. We deliver world-class audio, web and video conferencing wherever you are, whenever you need it and on the devices you already own. From one-on-one audio and video calls to full-scale company meetings among multiple locations, Lifesize is your complete, connected solution from the cloud to the conference room and everywhere in between.

## The Lifesize App

Our cloud-based app is designed to support all of the different ways your team likes to connect — audio, web and video conferencing, chat, and the ability to stream and record meetings all from one simple-to-use application built around one global, name-based directory.

## Lifesize® Icon™ Series

450 | 600 | 800

We design, develop and produce our own conferencing hardware. Our highly praised (and deservedly awarded) Lifesize Icon Series is a complete video conference room solution with options for small, medium and auditorium-sized meeting rooms.

## Lifesize® Phone™ HD

It's the smartphone for your conference room. Make video and audio calls with unrivaled audio quality, search the directory, share your screen and control the video pan/tilt/zoom right from the customizable touchscreen.

# A complete collaboration solution from the cloud to the conference room

## Web, Mobile and Desktop App

No more juggling apps to stay connected. Lifesize is a single app built for all of the devices your team loves to use — PC, Mac, Android, iOS or right from your Google Chrome™ or Internet Explorer® 11 browser.

## Plug-and-Play Conference Room Systems

The conference room is still the heart of most meetings. We offer integrated HD conference room cameras and touchscreen phones for small, medium and auditorium-sized meeting rooms.

## Standards-Based Interoperability

Lifesize supports any-to-any connectivity irrespective of devices, including standards-based video systems. We play well with others and even offer a unique integration with Skype for Business.

# Built around the features that really matter for team collaboration

## Search-Based Directory

Just click on a name to start a call — no hold music, no waiting for moderators, no dial strings. It's as easy as making a call can be.

## Schedule and Calendar Integrations

Set recurring meetings and easily send guest invites from the mail and calendar apps you use every day. You can even see a list of upcoming meetings from your conference room system.

## Screen Sharing

Transform your video call into a web conference by sharing your screen or presentation. That way you can collaborate on a document in addition to communicating face-to-face.

## Streaming and Recording

Stream meetings to up to 10,000 live attendees. You can also record and share meetings from your personal video library in your Lifesize account.

## Unlimited Guest Invites

Connect with anyone inside or outside of your organization with our seamless guest experience — no downloads or plugins required, and guests can join right from their browser.

## Audio Conferencing

Trade in your old audio-only solution for a more modern collaboration solution to cover video, web and audio conferencing with local dial-in numbers in over 60 countries.

# One IT-approved solution that's scalable, reliable and ready for business

## Reliability

We utilize the ultra fast private IBM® Cloud network to traverse the globe with industry-leading performance, reliability and scalability.

## Security

Our controls, policies and vendor management are aligned with ISO best practices, and all communication streams support 128-bit AES and TLS encryption for all signaling by default.

## Powerful Admin Console

Admins can pull in-depth reports on usage and room participation and modify account-level settings like Single Sign-on and real-time health monitoring alerts from their browser.

## 24x7x365 Extreme Support

We offer a 99.9% uptime service level agreement, and our dedicated Extreme Support team is available 24x7x365 with a 1-hour initial meaningful response time.
