

## LIFESIZE AND BLACKBOARD LEARN

# Create engaging video content with easy online access for educators and students

LifeSize® UVC Video Center™, the one-button streaming, recording and auto-publishing video solution from LifeSize, offers integration with the Blackboard Learn™ platform, a leading learning management system that serves thousands of higher education, K-12, professional, corporate and government organizations.

### Easy Access

As the educational landscape expands to include more digital resources, educators can easily use video to create engaging, multisensory learning experiences. Users of Blackboard Learn can access LifeSize UVC Video Center through a single Blackboard Learn sign-on. With UVC Video Center working behind the scenes, teachers can make live or recorded video part of their daily course materials and broadcast video content anywhere in the world. Students can view and play back HD-quality video from the Blackboard Learn interface, accessed from any computer, tablet or mobile device with Internet access.

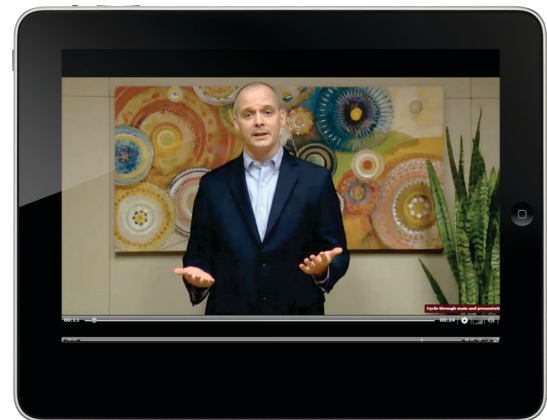

### Simple Setup

Blackboard Learn integration is available through an easy plug-in with the Enterprise Edition of LifeSize UVC Video Center. Built-in APIs deliver the core plug-in features. Once you install the plug-in on the Blackboard Learn server, it integrates with UVC Video Center so that authorized students and educators can view live and on-demand videos from the Blackboard Learn web UI. Plus, all permissions can be established and managed by your system administrator.

### Using Video to Enhance Online Learning

LifeSize video conferencing fosters effective collaboration and a more engaging learning experience. Imagine a class enriched through the addition of video content and collaborative exercises, where students can connect with remote classrooms and subject-matter experts located across the street or across the globe.

For a demonstration of streaming & recording capabilities, contact a LifeSize representative.

### Look at what you can do with LifeSize UVC Video Center:

- Extend distance-learning programs with live and recorded video content
- Play back recorded lessons for enhanced learning and study sessions
- Broadcast news stories, performances or interviews
- Visit world-class learning institutions, research facilities or lecture series
- Host video tutoring and Q&A sessions that every student can attend
- Reach homebound students, traveling faculty or anyone constrained by physical location
- Integrate multiparty video systems to bring in more participants

When UVC Video Center is integrated with Blackboard Learn, students have easy access to on-demand and live video content.
